

Made for New-Generation Riso Digital Duplicator

RISO Rice Bran Oil Ink

High quality ink that promotes environmental sustainability

Made from rice bran oil, the world's first ink applicable to Digital Duplicator

Reduces waste
in the manufacturing process

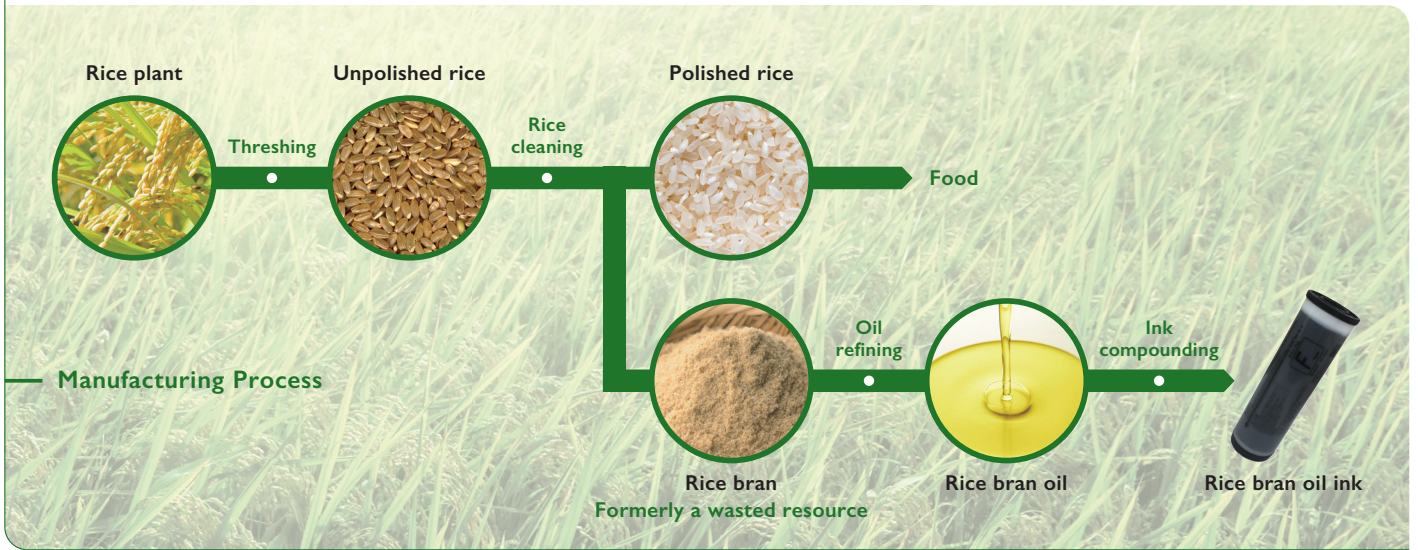

Reduces CO₂
in the distribution process

Reduces aging
for extended shelf life

For the Environment

Reduced Waste and Effective Utilization of Resources

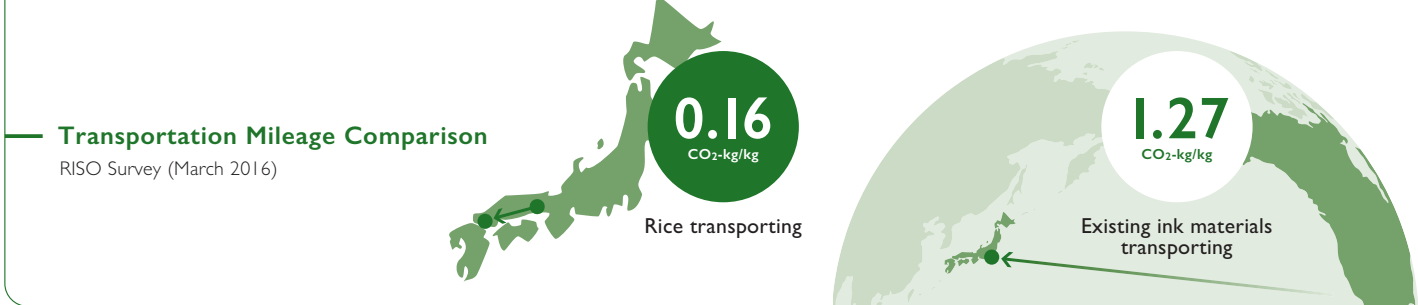

RISO Rice Bran Oil Ink contributes to environmental sustainability. Rice bran, which is otherwise wasted, is a raw material with no VOCs, and after the oil is extracted, can subsequently be used as fertilizer or animal feed.

Slashing CO₂

A Raw Material Close to the Manufacturing Source

RISO Rice Bran Oil Ink, utilizes rice harvested in Japan and therefore drastically reduces CO₂ generated through transportation mileage during the distribution processes required when ink is made from imported raw materials.

Quality Solution

Longer Shelf Life and Slower Aging

RISO Rice Bran Oil Ink guarantees a longer shelf life before use and reduced yellowing as printed matter ages, in comparison to existing ink.

RISO Rice Bran Oil Ink is for RISO SF Series. (RISO INK F Type)
