

Annual Results of take-backservice*

4.6.1.2 Provision of take-back service for broader scope of products

RISO general consumer products Take-back Annual	weight(metric tons) for 2019
Volume of products collected in local or federally mandated collection programs	: 0
Volume of products collected voluntarily	:1,787 lbs.
Total volume of product collected	: 1,787 lbs.

Take-back services are provided under the provisions outlined in section 4.6.1.1 of the RISO EPEAT web page. http://us.riso.com/EPEAT_4_6_1_1_Provision_of_Product_Take-back_Service

4.9.3.1 Provision of take-back and end-of-life management for cartridges and containers

The data below is based on the actual performance of recovery and recycling from January 2019 to December 2019

- a) Total tonnage of cartridges and containers collected annually: 0.36 (metric tons /year)
- b) Total tonnage of materials sent to each of the following end-of-life management methods as a proportion of total collected weight of cartridges and containers

Reuse of components	: 0 (metric tons/year)
Materials recycling	: 1,787 (pounds / year)
Waste-to-energy	: 0 (metric tons /year)
Material in storage, pending processing	: 0 (metric tons/year)
Incineration	: 0 (metric tons/year)
Landfill	: 0 (metric tons/year)

None of the cartridges and containers collected under the RISO provision for take back services will be disposed of by incineration or landfill.

4.9.3.3 Manufacturer recycles or reuses plastics collected through its cartridge and container take-back program

In 2019, a total of 1,787 lbs. of plastic was collected via our recycling programs. Specific details regarding the quantity of plastic collected and corresponding end-of-life management method used are demonstrated below.

End-of-Life Management Method	Weight (metric tons) for 2019
Plastic materials recycled	: 1,787 (pounds)
Waste-to-energy	: 0.00 (0%)
Incineration	: 0.00 (0%)
Landfill	: 0.00 (0%)

As noted above, 0% (less than 25%) of the plastic collected under the RISO provision for take back services was sent to waste-to-energy and none of the plastic collected was disposed of by incineration or landfill.

*Please note the current year's data is being compiled, and will be available in the next update. The next updated Annual Results Data report is scheduled for January 2021

Annual Results of take-backservice*

4.6.1.2 Provision of take-back service for broader scope of products

RISO general consumer products Take-back Annual	weight(metric tons) for 2018
Volume of products collected in local or federally mandated collection programs	: 0
Volume of products collected voluntarily	: 117 lbs.
Total volume of product collected	: 117 lbs.

Take-back services are provided under the provisions outlined in section 4.6.1.1 of the RISO EPEAT web page. http://us.riso.com/EPEAT_4_6_1_1_Provision_of_Product_Take-back_Service

4.9.3.1 Provision of take-back and end-of-life management for cartridges and containers

The data below is based on the actual performance of recovery and recycling from January 2018 to December 2018

- a) Total tonnage of cartridges and containers collected annually: 0.36 (metric tons /year)
- b) Total tonnage of materials sent to each of the following end-of-life management methods as a proportion of total collected weight of cartridges and containers

Reuse of components	: 0 (metric tons/year)
Materials recycling	: 117 (pounds / year)
Waste-to-energy	: 0 (metric tons/year)
Material in storage, pending processing	: 0 (metric tons/year)
Incineration	: 0 (metric tons/year)
Landfill	: 0 (metric tons/year)

None of the cartridges and containers collected under the RISO provision for take back services will be disposed of by incineration or landfill.

4.9.3.3 Manufacturer recycles or reuses plastics collected through its cartridge and container take-back program

In 2018, a total of 117 lbs. of plastic was collected via our recycling programs. Specific details regarding the quantity of plastic collected and corresponding end-of-life management method used are demonstrated below.

End-of-Life Management Method	Weight (metric tons) for 2018
Plastic materials recycled	: 117 (pounds)
Waste-to-energy	: 0.00 (0%)
Incineration	: 0.00 (0%)
Landfill	: 0.00 (0%)

As noted above, 0% (less than 25%) of the plastic collected under the RISO provision for take back services was sent to waste-to-energy and none of the plastic collected was disposed of by incineration or landfill.

*Please note the current year's data is being compiled, and will be available in the next update. The next updated Annual Results Data report is scheduled for January 2020.

Annual Results of take-backservice*

4.6.1.2 Provision of take-back service for broader scope of products

RISO general consumer products Take-back Annual	weight(metric tons) for 2017
Volume of products collected in local or federally mandated collection programs	: 0
Volume of products collected voluntarily	: 0
Total volume of product collected	: 0

Take-back services are provided under the provisions outlined in section 4.6.1.1 of the RISO EPEAT web page. http://us.riso.com/EPEAT_4_6_1_1_Provision_of_Product_Take-back_Service

4.9.3.1 Provision of take-back and end-of-life management for cartridges and containers

The data below is based on the actual performance of recovery and recycling from January 2017 to December 2017

- a) Total tonnage of cartridges and containers collected annually: 0 (metric tons /year)
- b) Total tonnage of materials sent to each of the following end-of-life management methods as a proportion of total collected weight of cartridges and containers

Reuse of components	: 0 (metric tons /year)
Materials recycling	: 0 (metric tons /year)
Waste-to-energy	: 0 (metric tons /year)
Material in storage, pending processing	: 0 (metric tons /year)
Incineration	: 0 (metric tons /year)
Landfill	: 0 (metric tons /year)

None of the cartridges and containers collected under the RISO provision for take back services will be disposed of by incineration or landfill.

4.9.3.3 Manufacturer recycles or reuses plastics collected through its cartridge and container take-back program

In 2017, a total of .36 metric tons of plastic was collected via our recycling programs. Specific details regarding the quantity of plastic collected and corresponding end-of-life management method used are demonstrated below.

End-of-Life Management Method	Weight (metric tons) for 2017
Plastic materials recycled	: 0.36 (metric tons) (100%)
Waste-to-energy	: 0.00 (0%)
Incineration	: 0.00 (0%)
Landfill	: 0.00 (0%)

As noted above, 0% (less than 25%) of the plastic collected under the RISO provision for take back services was sent to waste-to-energy and none of the plastic collected was disposed of by incineration or landfill.

*Please note the current year's data is being compiled, and will be available in the next update. The next updated Annual Results Data report is scheduled for January 2019.
