# ComColor FTSeries

ORISO

Ultra High-Speed Full-Color Inkjet Printers

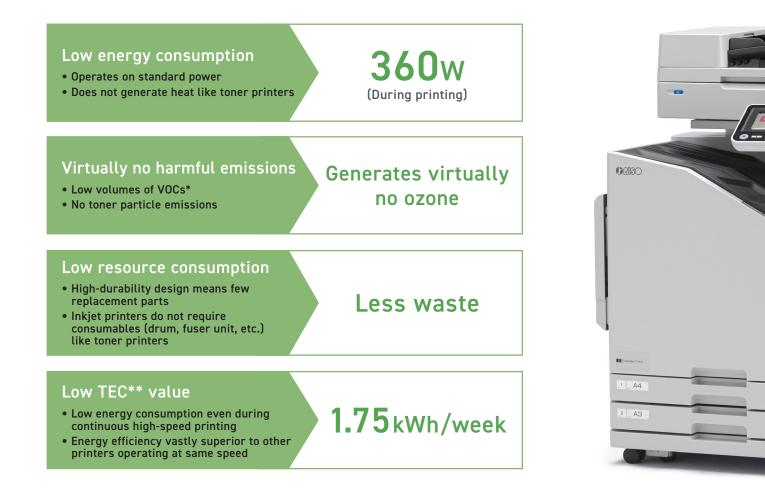

## A feature-rich lineup for NATURE-FRIENDLY, ULTRA-FAST full-color printing

High environmental performance, high efficiency

# Where environmental friendliness

# **Cleaner and Friendlier**

RISO's environmental ethos is—and always has been—to design and develop products that exert the smallest possible impact on the environment throughout their lifecycles.

#### BLUE ANGEL

German government-operated certification awarded to products and services meeting stringent requirements for sustainable consumption.

#### **ENERGY STAR®**

US-based voluntary program promoting energy efficiency. Strict energy-saving criteria must be satisfied to earn certification.

\*VOCs: Volatile organic compounds.

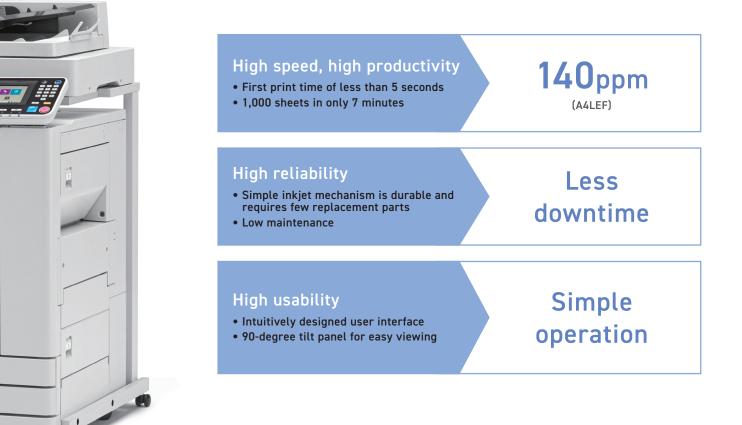

\*\*TEC value: Typical Electricity Consumption. This value represents electricity consumed in one week, and is based on the international ENERGY STAR standard. The TEC value is the value published on the ENERGY STAR website.

Values on these pages are specifications of the ComColor FT5430.

# and productivity unite.

# Smarter and Faster

Enjoy enhanced time efficiency, optimized TCO, and consistently high quality that only RISO can deliver.

#### **EPEAT Gold**

EPEAT is a US-based rating system. EPEAT Gold is the highest of three levels of sustainable performance.

#### **ECO MARK**

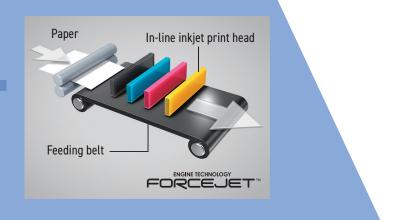

Japan-based environmental certification awarded to products featuring low environmental loading throughout the product lifecycle.

This can only be acquired by Japan models.

# Lower and Higher

### Heatless printing process

RISO's proprietary technology features in-line Piezo inkjet print heads which make possible single-pass full-color printing without generating heat.

#### Stationary print heads

Stationary print heads make possible stable, high-quality printing even at high speeds. And the simple paper feed mechanism enables printing on various types of paper.

#### Reduces energy, emissions

RISO inkjet printers do not generate heat during printing, nor do they generate ozone like toner printers.

#### Increases speed, efficiency

Oil-based ink is fast drying so paper doesn't curl, allowing you to move quickly to post-print processes.

#### High cost efficiency

- Proprietary ink and color profile development enable high quality at low running cost
- Short printing time means reduced labor and electricity costs

### Low running cost

#### High image quality

High media flexibility

(when optional accessories attached)

- Piezo drop-on-demand print heads
- Fast-drying oil-based ink for minimal bleeding and smearing
- New, higher black density improves visibility

# Enhanced visibility and color reproduction

Lightweight to heavyweight paper, as well as envelopes

#### Why inkjet?

• 46qsm-400qsm

Inkjet printing is more nature-friendly than laser printing, and still delivers excellent quality when printing in full color. And RISO technologies have also supported the advancement of high-volume industrial printing.

#### Why oil-based pigment ink?

It offers superior fading and water resistance, as well as strong resistance to bleeding. And, as it is fast-drying, paper rarely gets dirty or rippled – even during high-speed printing – enabling smooth high-speed duplex printing and transition to post-print processes.

Oil-based pigment ink enables flat, cold, dry output.

Water-based inks are prone to deformation such as rippling and curling.

### ComColor standard – high color quality

RISO developed its own intelligent color profile to maximize color reproduction and minimize bleeding. ComColor Standard assesses the color data and paper type, and adjusts the volume of ink applied based on the paper's absorption characteristics.

# **Richer and Fuller**

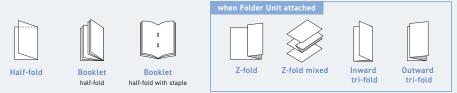

ComColor FT Series inkjet printers offer the complete package of industry-leading environmental friendliness and productivity, cost performance, and amazing functionality. And attaching the optional accessories available further enhances productivity and convenience. They're ideal high-speed, full-color printing solutions for all sizes and scales of operations, from small offices to in-plant applications. In-plant facilities are often tasked with fulfilling the needs of multiple departments and organizations, and ComColor FT Series printers, with blazing speed, gorgeous color reproduction, long duty cycles, and many sophisticated finishing options can satisfy the needs of various sizes of enterprises.

## FT Series optional accessories

## **Multifunction Finisher**

With its intelligent design and automatic execution, the Multifunction Finisher makes finishing processes such as stapling, punching, folding, and booklet making easier and more efficient than ever before.

#### High processing speed

Punch

Compatible with various paper size

• Keeps pace with FT Series high printing speed

Offset

stacking

#### Low power consumption

- High productivity, high efficiency
- Only uses 230W (without Folder Unit)

140ppm\* (A4LEF)

590W\* (in combination with FT main unit)

\*When attached to the ComColor FT5430

The RISO way to enjoy nature

### **Additional Sheet Feeder**

- Paper is replenishable even during printing
- Easy access and loading
- Max. 4,000 sheets in combination with paper feed tray provided with FT main unit

# 2,000 sheets

**Face Down Finisher** 

Compact size, simple operation

## **High-speed** HS7000 Scanner

- Scan sizes up to A3
- Simultaneous duplex scanning
- Compatible with various file formats (PDF, PDF/A, TIFF, JPEG)

## **Postscript RIP** for higher productivity

- · Compatible with transactional printing
  - Queue settings
  - Tray selection per page
  - Form overlay

### Intelligent automation with Postscript RIP

## -friendly, ultra-fast printing
