High Speed Colour Printer  
Model: HC5000T

This product contains RFID (Radio Frequency Identification) system.  
Model: 444-59003

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio / TV technician for help.

This Class B digital apparatus complies with Canadian ICES-003.  
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Preface

Welcome to the world of this product!
This machine is a finisher that is connected to a printer manufactured by our company and performs stapling, punching, and stitching of prints.

About This Manual

Notes

1) No part of this book may be reproduced without permission.
2) For improvement of the product, this manual is subject to change without prior notice.
3) Note that RISO is not liable for any influence caused by use of this manual or this unit.
4) For operation of the printer and the printer driver manufactured by our company, refer to the manuals supplied with the printer.
5) For scanning paper originals using an optional scanner, refer to the Help of the optional touch panel.
6) In this manual, the number of sheets is based on the dedicated paper (A4 / 85 g/m²).

Trademark Acknowledgments

All product names and company names written in this manual are trademarks or registered trademarks of their respective companies.
How to Read This Manual

Notation of Explanation of Operation

The following symbols are used in this manual for description of functions, operation, and notes.

- **Indicates items that should be noted or that are prohibited.**
- **Indicates description concerning particularly useful information that should be known.**
- **Indicates a title and page that should be referred to for understanding sufficiently an item.**
  For referring to another operation manual, the name of the manual is also written.

**WARNING** and **CAUTION** are cautions for safety. Be sure to read these items before using this machine.
Safety Precautions

This section describes the items that should be followed for safe use of this machine. Be sure to read this section.

Warning Symbols

To use the machine properly and to prevent human injury and damage to properties, the following warning symbols are used. Read the meaning of the symbols to understand and then read this manual.

| WARNING | Indicates that incorrect handling by ignoring this symbol may cause death or serious human injury. |
| CAUTION | Indicates that incorrect handling by ignoring this symbol may cause human injury or damage to properties. |

Location for Installation

⚠️ CAUTION

- This machine weighs approximately 440 kg (970lb) (maximum value with full options). Place the machine on a flat and stable surface. Otherwise, the machine might be inclined, resulting in human injury.
- Do not place the machine in a dusty or humid location. Otherwise, a fire or an electric shock might occur.

Power Connection

⚠️ WARNING

- Install the machine near the wall socket to avoid using an extension cord between the machine and the wall socket. If an extension cord is absolutely required, do not use longer than 5m (15ft). Otherwise, a fire or an electric shock might occur.
- Do not damage or rebuild the power cord. Placing a heavy object on the cord or pulling or bending forcibly the cord may damage the cord, resulting in a fire or an electric shock.
- The power cord supplied with this product can be used only for this machine. Do not use it for another electric product. A fire or an electric shock might occur.
- Do not plug or unplug the power cord if your hands are wet. Otherwise, an electric shock might occur.

⚠️ CAUTION

- Do not pull the power cord when unplugging it. Otherwise, it could become damaged and a fire or an electric shock might occur. Be sure securely to hold on to the plug before unplugging it.
- If the machine is not used for a long time, for example due to consecutive holidays, unplug the power cord from the electrical outlet for safety.
- Pull out the power plug from the electrical outlet more than once a year and clean the prongs of the plug and their surroundings. Dust collected on these areas can result in fire.
Handling

⚠️ WARNING
● Do not place water containers or metallic objects on the machine. If water drips inside the machine or a metallic object drops inside it, a fire or an electric shock might occur.
● Do not insert or drop any metallic material or flammable substances into the machine through any opening. A fire or an electric shock might occur.
● Do not remove the covers. Otherwise, you might be electrically shocked by the high-voltage part inside.
● Do not disassemble or rebuild the machine by yourself. Otherwise, a fire or an electric shock might occur.
● If the machine emits excessive heat, smokes or foul odour, immediately turn off the power, unplug the electrical (power) cord and contact your service representative because a fire or an electric shock might occur.
● If something drops inside the machine, immediately turn off the Main Power Switch, unplug the electrical (power) cord and contact your service representative. If you continue using it, a fire or an electric shock might occur.

⚠️ CAUTION
● Never stick your hands or fingers in the openings around the Cover Sheet Tray and the Stacking Tray during operation. Otherwise, human injury might occur.
● When moving the machine, contact your service representative. If you try to move the machine by force, the machine might turn over, resulting in human injury.
● When removing jammed staples, take sufficient care to prevent injury to fingers.
Before Starting to Use

This section explains precautions you have to observe when using the machine.

Location for Installation

- The location for installation is determined based on consultation with the customer at the time of delivery.
- Contact your service representative before moving the machine.
- Avoid installing the machine in the locations listed below. Failure to observe this precaution may lead to machine failure or human injury.
  - Locations that are subject to sudden temperature change.
  - Extremely hot and humid locations or cold and dry locations
  - Heated locations or locations to exposed to direct cold air, direct hot air, or direct radiant heat
  - Badly ventilated locations
  - Dusty locations
  - Locations that are subject to frequent vibration

Operation Environment

- Install the machine in a location of which the levelness meets the following conditions.
  Front to rear: 3 mm (1/8") or less
  Side to side: 3 mm (1/8") or less
- Appropriate environment conditions are shown below.
  Temperature range: 15°C - 30°C (59°F to 86°F)
  Humidity range: 40% - 70%(noncondensing)

Overall Dimensions

Space for extending the 3 fold tray and the Booklet tray is required.

The dimensions are expressed in mm.

Dimensions of HC full system (mm)

<table>
<thead>
<tr>
<th></th>
<th>Width</th>
<th>Depth</th>
<th>Height (*)</th>
<th>Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal state</td>
<td>2,833</td>

<td>1,278</td>
<td>1,335</td>
<td>For opening/closing Paper Feed Tray on the stand and ink cover</td>
</tr>
</tbody>
</table>

*:The optional touch panel display is not included.
Handling of The Machine

- Do not turn off the Main Power Switch of the printer or unplug the electrical (power) cord during operation.
- Do not open any covers during operation.
- Do not move the machine.
- The machine has precision parts and driving parts inside. Do not handle the machine in other ways than described in this manual.
- Do not place heavy objects on or apply shocks to the machine.
- Be sure to open and close any cover gently.

Power Connection

- Connect the power plug securely to the electrical outlet to avoid improper connection.
- Install the machine near the electrical outlet.

Registration of Paper Size

Non-standard paper sizes can be registered in the printer or in the controller. When using non-standard size paper, be sure to register the size. Up to five sizes can be registered in the printer and up to 20 sizes can be registered in the controller. The paper sizes that can be registered are shown below. The paper sizes that can be used, however, differ depending on the finisher functions to be used.

Paper sizes that can be registered

</tbody>
</table>

*1 Only if an HC Z Folder Unit is connected.
*2 The paper capacity depends on the paper size, paper type, and orientation.
Add cover
A front cover and/or a back cover are added to prints. p.2

Paper fold (Inner 3 fold / Outer 3 fold / Z fold / 2-fold)
Inner 3 fold, outer 3 fold or Z fold of prints is performed. p.11

Stapler
Prints are stapled. p.6

Booklet
2-fold booklets are made. Also centre binding can be performed with the Stapler function. p.14

Punching
Prints are punched. p.8

Offset output
Prints are output into the Stacking Tray with offset positioning. p.16
Finisher Configuration and Available Functions

As a finisher, the following models and options are provided. The available functions depend on your model.

HC Finisher A

- Stapler
- Punching (2 holes / 3 holes)
- Add cover
- Offset output
- Booklet
- Paper fold (2-fold)

HC Finisher B

- Stapler
- Punching (2 holes / 4 holes)
- Add cover
- Offset output
- Booklet
- Paper fold (2-fold)

HC Finisher A or B + HC Z Folder Unit (option)

- Stapler
- Punching (2 holes / 4 holes or 3 holes)
- Add cover
- Offset output
- Booklet
- Paper fold (inner 3 fold, outer 3 fold, Z fold, 2-fold)

Chapter 1 Finisher Applications

This chapter describes finisher applications and principal finisher functions. For details of the operation method and the setting method of the printer driver, refer to "HC5000 User's Manual for Printer Driver."
Finisher Functions

This section describes principal finisher functions.
For setting the functions described here, use the [Finisher] tab of the printer driver.

Add cover

A printed sheet of paper or another type of paper can be added to the body of prints as a front cover and/or a back cover. Load the covers in the Cover Sheet Tray of the Finisher or in the Interposer Tray of the printer.

![Cover examples](image)

Paper Types That Can Be Used for Add Cover

- Paper size and setting orientation:
  - A3
  - A4
  - A4 R
  - B4
  - B5 R
  - B5
  - Ledger
  - Legal
  - Letter
  - Letter-R

- Paper weight: For Cover Sheet Tray: 60g/m² - 220g/m² (16-lb bond to 58.7-lb bond)
  - For Interposer Tray: 60g/m² - 157g/m² (16-lb bond to 42-lb bond)

- Up to 200 sheets can be loaded in the Cover Sheet Tray.
- If [Booklet] is [ON], back covers cannot be added.
- If [Separate books] is set in Details of [Booklet], either front covers or back covers cannot be added.
- The paper size that can be loaded as front covers are the same as the paper size for the body of prints. When loading front covers of a different size from the body of prints, set the paper size of the tray (Cover Sheet Tray / Interposer Tray) to the size of [Output paper size] on the [Layout] tab of the printer driver. However, do not set [Auto].
- "4.1/4.2/4.3 Standard Feed Tray" of "HC5000 User’s Manual for Printer Main Body"
- "4.11 Cover Sheet Tray" of "HC5000 User’s Manual for Printer Main Body"
- Irregular size paper cannot be used as covers.
- When loading covers in the Interposer Tray, setting is required in advance.
- "5.3 Separation Paper" of "HC5000 User’s Manual for Printer Main Body"
Settings of Printer Related to This Function
- 4.1/4.2/4.3 Standard Feed Tray
- 4.11 Cover Sheet Tray
- 5.3 Separation Paper

Printer Driver Setting Related to This Function
- Output paper size on [Layout] tab

Method of loading Covers
Depending on the combination of finisher functions, load the covers face up or face down.
- For adding covers to booklets: Load the covers face down so that the first page is located on the left side.
- For adding covers to prints other than booklets (Stapler, Punching, etc.): Load the covers face up so that the punching or stapling position is located on the right side.

When using the Cover Sheet Tray of the Finisher, load the covers as shown below.

- When creating booklets:
  - Finished prints
  - Load the covers face down so that the first page is located on the left side.

- When punching or stapling:
  - Finished prints
  - Load the covers face up so that the punching or stapling position is located on the right side.
When using the Interposor Tray of the printer, load the covers as shown below.

When creating booklets:

If the Interposer Tray is set as the Standard Feed Tray, load the covers face up so that the first page is located on the right side.

If the Interposer Tray is set as Feed Tray 1 or 2, load the covers face down so that the first page is located on the left side.

When punching or stapling:

If the Interposer Tray is set as the Standard Feed Tray, load the covers face down so that the punching or stapling position is located on the left side.

If the Interposer Tray is set as Feed Tray 1 or 2, load the covers face up so that the punching or stapling position is located on the right side.
Flow of Paper

- Example of punching or stapling
  - Computer
  - Front covers
  - Back covers (loaded in the interposer Tray)
  - Punching
  - Stapling

- Example of creating a booklet
  - Computer
  - Covers
  - Creation of booklet (Prints are 2-folded and then stapled)
Stapler

Up to 100 sheets can be stapled at a specified position. The initial setting is [OFF]. For the paper size and setting orientation, refer to \( \Rightarrow \) p.10

Stapled prints are output to the Stacking Tray.

- **Paper Types That Can Be Used for Stapling**
  - Paper size and setting orientation:
    - A3
    - A4
    - B4
    - B5
    - Ledger
    - Legal
    - Foolscap
    - Letter
    - Letter R

  - Custom size: 203mm (8\( \frac{1}{4} \)) to 297mm (11\( \frac{11}{16} \)) and 182mm (7\( \frac{3}{16} \)) to 432mm (17\( \frac{1}{2} \))

  - Paper weight: 46g/m\(^2\) - 157g/m\(^2\) (12-lb bond to 42-lb bond) (up to 220g/m\(^2\) [58.7-lb bond] for cover sheet)

- **Maximum Number of Sheets for Stapling**
  - For A4, A4-R, B5-R, letter, and letter-R: 2 to 100 sheets
  - For standard sizes other than those above: 2 to 65 sheets

  - If the number of sheets exceeds the maximum number for stapling, printed sheets are output to the Stacking Tray without stapling.
  - For paper shown below, the maximum number for stapling is 2 to 65 sheets.
    - Paper with width in the paper ejection direction of 216 mm (8\( \frac{1}{2} \)) or more
    - Paper larger than the size of 297 mm (11\( \frac{11}{16} \)) long and 216 mm (8\( \frac{1}{2} \)) wide
**Binding Margin and Auto Reducing**
If the original has no margin for stapling, a margin can be made. The binding margin width can be set from 0 mm to 50 mm in 1 mm increments. If the image exceeds the paper size because of the margin, set [Auto reducing]. The image will be automatically reduced so that the image is included in the paper size.

**Relation to Punching**
The Stapler function can be used with the Punching function. The selectable stapling positions are restricted according to the setting of Punching.

<table>
<thead>
<tr>
<th>Setting of Punching</th>
<th>Stapling position</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>Left 2 positions / Left top 1 position / Top 2 positions / Top left 1 position / Top right 1 position / Right 2 positions / Right top 1 position</td>
</tr>
<tr>
<td>Left</td>
<td>Left 2 positions / Left top 1 position</td>
</tr>
<tr>
<td>Top</td>
<td>Top 2 positions / Top left 1 position / Top right 1 position</td>
</tr>
<tr>
<td>Right</td>
<td>Right 2 positions / Right top 1 position</td>
</tr>
</tbody>
</table>

**Flow of Paper**

![Flow of Paper Diagram]
Punching

The punching hole position can be selected. If HC Finisher A is connected, 2-hole or 3-hole punching can be made. If HC Finisher B is connected, 2-hole or 4-hole punching can be made. The initial setting is [OFF]. For the paper size and setting orientation, refer to p.10.

- **Paper Types That Can Be Punched**

<table>
<thead>
<tr>
<th>Punching hole</th>
<th>Paper size and setting orientation that can be used for punching</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 holes (initial setting)</td>
<td>A3</td>
</tr>
<tr>
<td></td>
<td>Ledger</td>
</tr>
<tr>
<td>3 holes / 4 holes</td>
<td>A3</td>
</tr>
</tbody>
</table>

- Paper weight: 46g/m² - 157g/m² (12-lb bond to 42-lb bond) (up to 220g/m² [58.7-lb bond] for cover sheet)

- **Relation to Stapler**

The Punching function can be used with the Stapler function. In this case, the selectable punching positions are restricted according to the setting of the Stapler function.

<table>
<thead>
<tr>
<th>Setting of Stapler</th>
<th>Punching position</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>Left / top / right</td>
</tr>
<tr>
<td>Left 2 positions / Left top 1 position</td>
<td>Left</td>
</tr>
<tr>
<td>Top 2 positions / Top left 1 position / Top right 1 position</td>
<td>Top</td>
</tr>
<tr>
<td>Right 2 positions / Right top 1 position</td>
<td>Right</td>
</tr>
</tbody>
</table>
**Binding Margin and Auto Reducing**
A margin can be set so that the punching holes do not overlap the image area. The binding margin width can be set from 0 mm to 50 mm (2") in 1 mm (0.04") increments. If the image is not included in the image area, the image can be automatically reduced when the binding margin is set.

**Flow of Paper**

The tray to which prints are output is switched according to the setting of [Output Tray].
Relation between Paper Setting Orientation in Tray and Stapling/Punching Position

For stapling and punching, the paper width shall be within the range from 203 mm (8") to 297 mm (11 11/16").

Load the paper in the proper orientation in a tray so that the stapling or punching position is perpendicular to the paper output direction. The image print orientation is automatically rotated according to the stapling/punching position and the paper setting orientation in the tray.

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Original</td>
<td>Portrait</td>
<td>Landscape</td>
</tr>
<tr>
<td>Paper output image</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Left top 1 position / Left</td>
<td><img src="left_top1_position.png" alt="A" /></td>
<td><img src="landscape.png" alt="A" /></td>
</tr>
<tr>
<td>Top left 1 position / Top</td>
<td><img src="top_left1_position.png" alt="A" /></td>
<td><img src="landscape.png" alt="A" /></td>
</tr>
<tr>
<td>Right top 1 position / Right</td>
<td><img src="right_top1_position.png" alt="A" /></td>
<td><img src="landscape.png" alt="A" /></td>
</tr>
<tr>
<td>Top right 1 position / Top</td>
<td><img src="top_right1_position.png" alt="A" /></td>
<td><img src="landscape.png" alt="A" /></td>
</tr>
<tr>
<td>Top 2 positions / Top</td>
<td><img src="top2_positions.png" alt="A" /></td>
<td><img src="landscape.png" alt="A" /></td>
</tr>
<tr>
<td>Left 2 positions / Left</td>
<td><img src="left2_positions.png" alt="A" /></td>
<td><img src="landscape.png" alt="A" /></td>
</tr>
<tr>
<td>Right 2 positions / Right</td>
<td><img src="right2_positions.png" alt="A" /></td>
<td><img src="landscape.png" alt="A" /></td>
</tr>
</tbody>
</table>

When stapling or punching onto paper larger than A4, set [Duplex printing] of the printer driver to [Short edge binding]. If [Long edge binding] is set, either stapling or punching cannot be performed.
Paper Fold

If an optional HC Z Folder Unit is installed to the Finisher, the outer 3 fold, inner 3 fold, and Z fold functions can be used.

- **Paper Types That Can Be Used for Paper Fold**

<table>
<thead>
<tr>
<th>Paper fold</th>
<th>Paper size and setting orientation that can be used</th>
</tr>
</thead>
<tbody>
<tr>
<td>Outer 3 fold / inner 3 fold</td>
<td>A4, Letter</td>

</tbody>
</table>

* Paper weight: 60g/m² to 90g/m² (16-lb bond to 24-lb bond) (up to 105g/m² [28-lb bond] for 2-fold)

- **Designation of Print Face (outer 3 fold / inner 3 fold / 2-fold)**

  If outer 3 fold, inner 3 fold or 2-fold is selected, the print face can be selected.
  
  - Print inside (initial setting): The print face (*) is located inside when the paper is folded.
  - Print outside: The print face (*) is located outside when the paper is folded.

*First page in duplex printing
- **Designation of Binding Direction (Z fold)**
  If Z fold is selected, the binding direction can be selected.
  - Left binding (initial setting): The right half of paper is folded in a Z shape so that the paper is bound at the left side. For portrait originals, the lower side (bottom) of the paper is folded in a Z shape.
  - Right binding: The left half of paper is folded in a Z shape so that the paper is bound at the right side. For portrait originals, the upper side (top) of the paper is folded in a Z shape.

- **Flow of Paper**

  - **For inner 3 fold / outer 3 fold:**

  ![Diagram](image1)

  - Either stapling or punching cannot be performed.

  - **For Z fold:**

  ![Diagram](image2)

  - If the Stapler function is used, paper is output into the Stacking Tray.
  - If paper is output to the Stacking Tray, the paper capacity differs depending on the paper size.
    - A3 / Ledger: 30 sheets
    - B4: 40 sheets
Either stapling or punching cannot be performed.

Removing Paper from the 3 fold Tray

When removing paper output into the 3 fold tray, press the 3 fold tray eject button of the Finisher.
After removing the paper, push back the 3 fold tray.

- When removing the paper from the 3 fold tray, ensure that the printer power is on. If the printer power is off, even if the 3 fold tray eject button is pressed, the 3 fold tray is not ejected.
- When the 3 fold tray is full of paper, a message appears in the display of the printer. Pull out the 3 fold tray and remove all the paper. If paper remains, the paper capacity for the next job will be reduced.

Paper Capacity in 3 fold Tray
Outer 3 fold / inner 3 fold: 30 sheets
Duplex printing of multiple continuous pages is performed with pagination, and the prints are folded in two to create a booklet. Centre binding by stapling can also be performed.

Paper Types That Can Be Used for Booklet
- Paper size and setting orientation:
  - A3
  - A4
  - B4
  - Ledger
  - Legal
  - Foolscap
  - Letter
  - Custom size

- Paper weight: 60g/m² to 90g/m² (16-lb bond to 24-lb bond) (up to 220g/m² [58.7-lb bond] for covers and up to 105g/m² [28-lb bond] for Fold)

Maximum Stapling Capacity
The capacity is 60 pages (15 sheets) in total including covers.

Separate Books
When making a booklet of 16 sheets (61 pages) or more, the Separate books setting is required.
- Auto: For Fold and staple, prints are separated every 15 sheets (60 pages). For only Fold, prints are separated every 5 sheets (20 pages).
- No. /sheets?: The number of sheets separated with the Separate books function can be set. The number can be set from 1 to 15 sheets (60 pages) for Fold and staple and from 1 to 5 sheets (20 pages) for Fold.

When creating a booklet from prints of 16 sheets (61 pages) or more, be sure to use the Separate books function. If [Separate books] is set to [OFF] for prints of 16 sheets (61 pages) or more, stapling is not performed and a booklet with an incorrect page order and fold is created.

Centre Binding Margin / Auto Reducing
To prevent the folding portions from hiding in 2-fold, a margin can be set at the centre of the folding portion. The centre binding margin can be set from 0 mm to 50 mm (2") in 1 mm (0.04") increments. Also the image can be automatically reduced so that the image is included in the image area.

Print Cover Separately
When adding a cover to a booklet, the cover and other pages can be printed separately.
Flow of Paper

Method of Using the Booklet Tray

Up to 20 sets can be output to the Booklet tray. When outputting a lot of booklets into the Booklet tray, pull out the plate and turn it down. Place a box or the like under the tray to store booklets. To return the plate to its original position, raise the plate and slide it toward the Finisher.

- When the Booklet tray becomes full, a message appears in the display of the printer. Remove all the output booklets.
- The maximum number of sets that can be output depends on the paper size and the number of pages.
Output Tray

Use this function to set a tray to which prints are output. Normally, set this function to [Auto].

- **Settings**
  - **Auto**: An adequate tray is automatically selected according to the driver setting.
  - **Stacking Tray**: Prints are output to the Stacking Tray. If the number of sheets to be output exceeds 500, select the Stacking Tray.
    The size of paper that can be output to the Stacking Tray is 182 mm to 330 mm x 182 mm to 488 mm (7\(\frac{3}{4}\)“ to 13” x 7\(\frac{3}{16}\)“ to 19\(\frac{3}{16}\)“).
    (for stapling: 203 mm to 297 mm x 182 mm to 432 mm [8” to 11\(\frac{1}{16}\)” x 7\(\frac{3}{16}\)” to 17”])

  - If the following functions are set, [Stacking Tray] cannot be selected.
    - Booklet: [Fold and staple] or [Fold] is selected.
    - Paper fold: One of [Outer 3 fold], [Inner 3 fold], and [2-fold] is set.

Offset Output

Prints are output to the Stacking Tray at an offset position for each set.

- **Paper Types That Can Be Used for Offset Output**
  - **Paper size**: 203 mm (8”) to 297 mm (11\(\frac{1}{16}\)"")
    182 mm (7\(\frac{3}{16}\)”) to 460 mm (18\(\frac{1}{4}\)“)
    (for stapling: 182 mm (7\(\frac{3}{16}\)”) to 432 mm (17”))
  - **Paper weight**: 46 g/m\(^2\) to 157 g/m\(^2\) (12-lb bond to 42-lb bond)
Example of Operation with Finisher

Example 1: Preparation of Stapled Material for Meeting

Ataple two or more papers like the conference material etc.

Material to Be Prepared
Procedure for preparing the following material is described here.

- Stapling at left top 1 position
- Offset output for each set
- Binding margin width: 10 mm (\(\frac{3}{8}\)"") (with auto reducing)

Printed sheets or other sheets of paper can be added as front covers and back covers.

p.2
1 Prepare data to be printed.

2 Display the [Print] dialog box.
   Select [Print] from the [File] menu.

3 Enter the Number of copies and click the [Properties] button.

4 Set the following items on the [Finisher] tab.
   - Stapler: Left top 1 position
   - Offset output: ON

5 Click the [Details] button for [Stapler] and set the following items.
   - Put binding margin: Place a checkmark.
   - Binding margin width: 10 mm (3/8")
   - Auto reducing: Place a checkmark.

6 Perform printing.
   Stapled prints are output into the Stacking Tray. Since the prints are offset for each set, classification is easy.
Example 2: Creation of Booklet with Centre Binding

An example of procedure for creating twice-folded booklets such as pamphlet and catalog is described below. This procedure is useful for making travel pamphlets, advertisements, leaflets, handy manuals, and catalogs.

Requirements for Creating Booklets
- An HC Finisher with Booklet maker unit is connected to the printer.
- The capacity for stapling is 60 pages (15 sheets) in total including covers.

Booklet to Be Created
Procedure for creating the following booklets is described here.
- 2-fold and centre binding (Stapler)
- Centre binding margin: 10 mm ($3/8\,"$) (auto reducing)

Printed sheets or other sheets of paper can be added as the cover.

p.2
1. Prepare data to be printed.

2. Display the [Print] dialog box.
   Select [Print] from the [File] menu.

3. Enter the Number of copies and click the [Properties] button.

4. Set the following item on the [Finisher] tab.
   Booklet: Fold and Staple

   ![Image of printer driver settings]
   The printer driver performs automatically the optimum setting.

5. Click the [Details] button for [Booklet] and set the following items.
   - Put centre binding margin: Place a checkmark.
   - Binding margin width: 10 mm (3/8“)
   - Auto reducing: Place a checkmark.

   ![Image of booklet settings]

! Be sure to clear the checkmark from [Collate].
Set the ejection mode on the [Main setting] tab.
6 **Perform printing.**
Booklets with centre binding are output into the Booklet tray.

7 **Press the Booklet eject button on the Finisher and remove the booklets.**
The output booklets move to the right so that they can be easily removed.
Example 3: Creation of Pamphlets with Inner 3 Fold

Direct mail, advertisements, and leaflets are made by folding in two or three.

- **Requirements for Paper Fold**
  - An HC Finisher with optional HC Z Folder Unit is connected to the printer.
  - Paper that can be used for the desired fold is set in a feed tray. p.11

- **Prints to Be Created**
  Procedure for creating the following prints is described here.
  - The original size is A4-R.
  - Inner 3 fold
  - Duplex printing is performed with the first page outside.
1 Prepare data to be printed.

2 Display the [Print] dialog box.
   Select [Print] from the [File] menu.

3 Enter the Number of copies and click the [Properties] button.

4 Set the following item on the [Main setting] tab.
   Duplex printing: Short edge binding

5 Set the following item on the [Finisher] tab.
   Paper fold: Inner 3 fold

Be sure to clear the checkmark from [Collate].
Set the ejection mode on the [Main setting] tab.
6 Click the [Details] button for [Paper fold] and set the following item.
   Folding direction: Print outside

7 Perform printing.
   The data is printed.

8 Press the 3 fold tray eject button on the Finisher to pull out the 3 fold tray and remove the paper.
Chapter 2 Troubleshooting

This chapter describes the method of removing jammed paper from inside the Finisher and the operation against jammed staples.
If trouble occurs in the Finisher during printing, printing stops and a symbol lights up on the Operation Panel of the printer or an error message appears in the display. You can check the location based on the symbol or the number and see the information from the message in the display.

When an error occurs in the Finisher, error symbol 21 lights up. If error symbol 1, 2 or 5 - 20 lights up, an error occurs in the printer. For measures against the error, refer to "HC5000 User's Manual for Printer Main Body."

### Error Message and Error symbols

- **Error Number**
  Under a message in the display, an error number that consists of alphanumeric characters is displayed. The first letter of the error number indicates the error type. The number of digits of the error number depends on the error location.

*HC5000 User's Manual for Printer Main Body*
Paper Jam Occurs.

If a paper jam occurs in the Finisher or in the printer, printing stops and the jam location is indicated on the Operation Panel and the optional touch panel. In this case, remove the jammed paper and resume printing.

Since this printer performs high speed paper feeding and output, paper jams may occur at multiple locations. In this case, remove all the jammed paper.

⚠️ Gently remove the jammed paper. Take care not to leave pieces of paper inside the printer and the Finisher.

📚 Paper Jam Location
Details of the locations indicated on the Operation Panel and the optional touch panel display are shown below.

- Operation Panel of printer

<table>
<thead>
<tr>
<th>Paper Jam (Finisher)</th>
<th>Remove Paper</th>
</tr>
</thead>
<tbody>
<tr>
<td>X□□□□□□□□□□□□□□□□□</td>
<td>H3</td>
</tr>
</tbody>
</table>

A number that indicates the paper jam location is displayed.
- H1～H20: In the printer
- F1～F17: In the Finisher

- PS7R touch panel (optional)
As shown in the figure below, numbers that indicate paper jam locations are indicated on the screen. Touch the number to display the method of removing jammed paper.

Remove all jammed paper until all the paper jam indicators are cleared because paper remains if any indicator is displayed. After removing jammed paper, close the covers of the printer and the Finisher and check that all paper jam location display is cleared on the Operation Panel of the printer and on the optional touch panel display.

- For removing jammed paper from the printer (when H1 - H20 is lit), refer to "HC5000 User's Manual for Printer Main Body."
- This guide explains the method of removing jammed paper in the case of the printer equipped with an HC Finisher with HC Z Folder Unit. The method may vary with the configuration of the Finisher.
For detailed procedure for removing jammed paper, refer to the respective indicated pages.

H3 Paper Jam in the Paper Receiving Section

1 Open the Transfer Cover.

2 Pull out and remove the jammed paper.

3 Close the Transfer Cover.

If it is not easy to pull out the paper, open the Front Cover of the printer and remove the paper from the side of the Transfer Roller because the paper might be torn.

H4 Paper Jam at the Right Transfer Path Cover

1 Open the Transfer Cover.

2 Open the Right Transfer Path Cover.

3 Remove the jammed paper.

4 Return the covers to their original positions.
1 Open the covers.

2 Open [1a] downward.

3 Remove the jammed paper.

4 If it is not easy to pull out the paper, open the Transfer Cover and remove the jammed paper.

5 Return [1a] to its original position.

6 Close the covers.
1 Open the covers.

2 Open [1a] downward and remove the jammed paper while turning [1c] counterclockwise.

3 If it is not easy to pull out the paper, raise [1d] to lock it.

4 While turning [1c] clockwise, remove the jammed paper.

5 Return [1a] and [1d] to their original positions.

6 Close the covers.
1 Open the covers.

2 Open [1b] to the right and remove the jammed paper.

3 If it is not easy to pull out the paper, raise [1d] to lock it.

4 While turning [1c] clockwise, remove the jammed paper.

5 Return [1b] and [1d] to their original positions.

6 Close the covers.
1. Open the covers.
2. Open [3d] and [3b] to the left and remove the jammed paper.
3. If it is not easy to pull out the paper, raise [2a] to lock it.
4. While turning [3a] clockwise, remove the jammed paper.
5. Return [2a] and [3b] to their original positions and then return [3d] to its original position.
6. Close the covers.
1 Open the covers.

2 Open [3e] downward.

3 While turning [3c] clockwise, remove the jammed paper.

4 If it is not easy to pull out the paper, open [3d] and [3b] to the left, and remove the jammed paper.

5 Return [3b] to its original position and then return [3d] and [3e] to their original positions.

6 Close the covers.
1. Open the covers.
2. Raise [3g] to lock it.
3. While turning [3f] clockwise, remove the jammed paper.
4. Return [3g] to its original position.
5. Close the covers.
1 Open the covers.

2 Open [4b] to the left.

3 While turning [3a] clockwise, remove the jammed paper.

4 Return [4b] to its original position.

5 Close the covers.
1. Open the covers.

2. Raise [2a] to lock it.

3. While turning [3a] counterclockwise, remove the jammed paper.

5. Close the covers.
1 Open the covers.

2 Pull out the 3 fold tray [2d].

3 Open [2g] to the right until it stops.

4 Remove the jammed paper.

5 Return [2g] to its original position and return the 3 fold tray [2d] to its original position.

6 Close the covers.
1 Open the covers.

2 Open [2b] to the left.

3 While turning [2c] counterclockwise, remove the jammed paper.

4 Return [2b] to its original position.

5 Close the covers.
1 Open the covers.

2 Pull out the 3 fold tray [2d].

3 Open [2e] to the upper right to lock it and remove the jammed paper.

4 If it is not easy to pull out the paper, return [2e] to its original position and then raise [2f] to lock it.

5 While turning [2c] counterclockwise, remove the jammed paper.

6 Return [2f] to its original position and return the 3 fold tray [2d] to its original position.

7 Close the covers.
1. Open the covers.

3. Turn [4a] until no paper comes out.

4. Grasp and pull the green tab to open the cover and remove the jammed paper.

5. Return the green tab to its original position and return the Booklet maker unit [4] to its original position.

6. Close the covers.
F13

1 Remove the paper jammed in the Top Tray.

2 Open and close the covers.

F14

1 Remove the paper jammed in the Stacking Tray.

2 Open and close the covers.
1. Open the covers.

2. Turn [4a] clockwise until no paper comes out into the Booklet tray.

3. Close the covers.
1 Press the cover button [1e] located on the Cover Sheet Tray to open the cover and remove the jammed paper.

2 If it is not easy to pull out the paper, open the left cover.

3 Open [1b] to the right and remove the jammed paper.

4 Return [1b] to its original position.

5 Close the left cover.

6 Return the cover of the Cover Sheet Tray to its original position.
1 Open the Transfer Cover.

2 Pull out and remove the jammed paper.

If it is not easy to pull out the paper, do not pull it forcibly because the paper might be torn. In this case, open the left cover of the Finisher and remove the paper from the side of the Transfer Roller.

3 Close the Transfer Cover.
Staples Run Out

When staples run out, printing stops and a message appears in the printer display. Check the message and insert new staples using the following procedure.

For Stapler Cartridge UR1

1. Open the cover.

2. Hold the handle of the cartridge and pull it to the front and up a little.

3. Press the points indicated by the arrows (1) to flip open the cover of the cartridge (2) and remove the staple case (3).

4. Insert a new staple case into the cartridge.

5. Remove the sealing tape from the staple case.

6. Close the cover of the cartridge.
7 Return the cartridge to its original position.
Push the cartridge in until it clicks.

8 Close the cover.

For Stapler Cartridge UR2 or UR3

1 Open the cover.

2 While pressing the lever to the right, pull out the unit to the front.

3 Hold the tabs located on both sides of the cartridge and lift the cartridge to the upper left.

4 Hold the tabs located on both sides of the new cartridge and insert the cartridge into the unit.
Press the cartridge down until it clicks.

5 Return the unit to its original position.

6 Close the cover.
Stapling Cannot Be Performed Properly.

This section describes the measures against stapling failure.

When stapling results in these problems, contact your local dealer (or service representative).
1 Open the cover.

2 Hold the handle of the cartridge and pull it to the front side to remove while raising it a little.

3 Open the cover of the cartridge and remove the jammed staple.

**CAUTION**
Take care not to injure your fingers or the like.

4 If the jammed staple cannot be removed, press the bottom of the cartridge in the direction indicated by the arrow to remove the staple.

5 Return the cartridge to its original position.
Press the cartridge down until it clicks.

6 Close the cover.
For Stapler Cartridge UR2 or UR3

1 Open the cover.

2 While pressing the lever to the right, pull out the unit to the front side.

3 Hold the tabs located on both sides of the cartridge and lift the cartridge to the upper left.

4 Remove the jammed staple.

5 Hold the tabs located on both sides of the cartridge and return the cartridge to the unit as it was. Press the cartridge down until it clicks.

6 Return the unit to its original position.

7 Close the cover.

⚠️ CAUTION
Take care not to injure your fingers or the like.
The Trash Box in Punching Unit is Full of Punch Dust.

If the trash box in punching unit becomes full of chips (punch dust), printing stops and a message appears in the display of the printer. Check the message and remove the trash box in punching unit to discard the chips.

- When the trash box is removed, be sure to discard all the chips. If chips remain, the box becomes full of chips before the message indicating replacement is displayed, resulting in failure.

- Be sure to perform this operation while the printer power is on. When the printer is in the sleep mode, press the Wake-Up Key on the operation panel to turn on the printer power. If not, the printer cannot recognize that the trash box in punching unit is emptied.

1. Open the cover.
2. Pull out the trash box in punching unit to the front side to remove it.
3. Discard all the chips.
   Check that no chip remains in the trash box.
4. Return the trash box in punching unit to its original position.
5. Close the cover.
Other Trouble

The Finisher Does Not Operate.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause and Solution</th>
</tr>
</thead>
</table>
| The Finisher does not operate.         | • Check to see if the power plug is properly inserted into the outlet.  
• Check to see if the printer is securely connected to this unit through the cord.  
• Check to see if the printer main power is on. If the power is off, turn on the power and then turn on the Operation Panel of the printer.  
• Turn off the printer power and then on again.  
Alternatively, restart the computer that is connected to the printer.  
If the Finisher does not operate nevertheless, contact your local dealer (or service representative). |
| An error occurs.                       | An error occurs in the printer or the Finisher.  
Check the error message displayed on the Operation Panel of the printer and take proper measures.  
"Chapter 3 Troubleshooting" of "HC5000 User's Manual for Printer Main Body” p.3-1 |

The Finisher Does Not Operate according to the Setting.

| Covers cannot be added.                | [Add cover] is not set in the printer driver.  
Set [Add cover] on the [Finisher] tab in the printer driver.  
"Add cover" of "HC5000 User's Manual for Printer Driver” p.3-3 |
| Paper is not loaded in the Cover Sheet Tray. | Check the paper types and the number of sheets that can be loaded in the Cover Sheet Tray and load the paper.  
"Add cover" p.2 |
| Setting of the Cover Sheet Tray is not performed. | For loading paper in the Cover Sheet Tray, register the type of paper to be loaded using menu setting "4.11 Cover Sheet Tray” of the printer.  
"4.11 Cover Sheet Tray” of "HC5000 User's Manual for Printer Main Body” p.2-29  
When registering, match the menu settings with the settings of [Output paper size] and [Paper type] of the printer driver. If the settings do not match, the printer judges that no paper is loaded and does not perform printing. |
| The orientation of the covers is different from the setting. | The orientation of setting of the covers is different.  
For adding covers to booklets, load the paper with the back side up and the first page to the left in the Cover Sheet Tray.  
For adding covers to prints other than booklets using stapling or punching, load the paper with the front side up and the stapling or punching position to the right.  
"Chapter 3 Troubleshooting” of "HC5000 User's Manual for Printer Main Body” p.3-1 |

Consumables

About Consumables

You can check the status of printer operation and consumables on the [Monitoring screen] of RISO Console PS7R. For details, refer to "HC5000 User's Manual for Console."

Types of Consumables

<table>
<thead>
<tr>
<th>Type of staple</th>
<th>Quantity</th>

<tbody>
<tr>
<td>HC STAPLE 100</td>
<td>5000 pcs. x 3 cases</td>
</tr>
<tr>
<td>HC STAPLE BOOKLET</td>
<td>5000 pcs. x 4 cases</td>
</tr>
</tbody>
</table>

⚠️ Use staples recommended by our company. Do not use improper consumables because they may cause failure or trouble.
List of Options

A variety of options are available for convenient use of this unit. For purchase, contact your dealer (or service representative) for inquiry.

Scanner Connection Kit

By connecting a scanner and a touch panel display (products specified by our company), you can perform high-speed full-color copying.

With the touch panel display, you can use the "Monitoring" function to check the status of the printer and the Finisher. If a paper jam occurs, the jam location is indicated on the screen. Touch the indication to display the method of removing jammed paper.

HC Z Folder Unit

By installing this unit to HC Finisher A or HC Finisher B, outer 3 fold, inner 3 fold, and Z fold can be used.

(As of September 2005)
## Specifications

### HC Finisher A/ HC Finisher B

| Tray System | Top Tray: Sorting, stacking  
Stacking Tray: Sorting, stacking (offset) |
|-------------|----------------------------------------|
| Paper Size  | Top Tray: Max. A3W or equivalent (330 mm x 488 mm [13" x 19\tiny{3/16}""])  
Min. 100 mm x 148 mm (4" x 5\tiny{13/16}"")  
Stacking Tray: 182 mm to 330 mm x 182 mm to 488 mm (7\tiny{3/16}" to 13" x 7\tiny{3/16}" to 19\tiny{3/16}"")  
Use of Cover Sheet Tray: A3/A4/A4-R/B4/B5/B5-R/Ledger/Legal/Letter/Letter-R  
For stapling: A3/A4/A4-R/B4/B5-R/Ledger/Legal/Foolscap/Letter/Letter-R/ custom size entry  
(203 mm to 297 mm x 182 mm to 432 mm [8" to 11\tiny{11/16}" x 7\tiny{3/16}" to 17"]  
For punching (2 holes): A3/A4/A4-R/B4/B5-R/Ledger/Legal/Letter-R  
For punching (3 holes / 4 holes): A3/A4-R/Ledger/Letter-R  
For creation of booklet: A3/A4/B4/Ledger/Legal/Foolscap/Letter/ custom size entry (210 mm to 316 mm x 279 mm to 457 mm [8\tiny{1/4}" to 12\tiny{7/16}" x 11\tiny{11/16}" to 18"])  
For offset output: 203 mm to 297 mm x 182 mm to 460 mm (8" to 11\tiny{11/16}" x 7\tiny{3/16}" to 18\tiny{1/8}")  
(For stapling: 203 mm to 297 mm x 182 mm to 432 mm (8" to 11\tiny{11/16}" x 7\tiny{3/16}" to 17")] |
| Paper Weight | Cover Sheet Tray: 60 to 220 g/m\textsuperscript{2} (16-lb bond to 58.7-lb bond)  
Top Tray: 46 to 157 g/m\textsuperscript{2} (12-lb bond to 42-lb bond) paper, postcard (up to 220 g/m\textsuperscript{2} [58.7-lb bond] for cover sheet)  
Stacking Tray: 46 to 157 g/m\textsuperscript{2} (12-lb bond to 42-lb bond) paper (up to 220 g/m\textsuperscript{2} [58.7-lb bond] for cover sheet)  
Booklet Tray: 60 to 90 g/m\textsuperscript{2} (16-lb bond to 24-lb bond) paper (up to 220 g/m\textsuperscript{2} [58.7-lb bond] for cover sheet and up to 105 g/m\textsuperscript{2} [28-lb bond] for Fold) |
| Paper Capacity (*2) | Top Tray: 500 sheets  
Cover Sheet Tray: 200 sheets  
Stacking Tray: 2,000 sheets (200 sets)  
Booklet Tray: 20 sets |
| Stapling Capacity (*2) | Stapler: 2 to 100 sheets (2 to 65 sheets for A4 size or larger)  
Centre binding: 2 to 15 sheets (including covers) |
| Paper Capacity for Folding (*2) | Fold and staple: 2 to 15 sheets  
2-fold: 1 to 5 sheets |
| Power Source | AC 100 - 120 / 220 - 240 V, 50/60 Hz, 2.0 / 1.0 A or more |
| Power Consumption | Maximum: 175 W or less (if HC Z Folder Unit is connected: 200 W)  
Stand-by: Approximately 30 W or less  
Sleep mode: Approximately 1W or less |
| Operating Noise | Operating: 68 dB or less |
| Operating Environment | Temperature: 15°C to 30°C (59°F to 86°F) ; Humidity: 40% to 70% (no dew condensation) |
| Mass (*3) | 130 kg (286 lb) (with transfer unit: 143 kg [315 lb]) |
| Dimensions (W x D x H) | 1,050 mm x 725 mm x 1,165 mm (41\tiny{5/16}" x 28\tiny{9/16}" x 45\tiny{7/8}"") (with transfer unit: 1,358 mm x 725 mm x 1,165 mm [53\tiny{5/16}" x 28\tiny{9/16}" x 45\tiny{7/8}""]) |

*1 The maximum paper size that can be specified by the printer driver is 316 mm x 460 mm (12\tiny{7/16}" x 18\tiny{1/8}"").  
*2 For 85 g/m\textsuperscript{2} (22.6-lb bond), A4  
*3 Consumables are not included.
