HC5500 Series
User's Manual
for Printer Main Body
High Speed Colour Printer
Model: HC5500T

This product contains RFID (Radio Frequency Identification) system.
Model: 444-59005

Contains FCC ID: RPARFMHL00
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The user is cautioned that unauthorised changes or modifications not approved could void the user’s authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

Contains Canada IC: 4819A-RFMHL00
Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
This Class B digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Countries of intended use
Austria/Belgium/Denmark/Finland/France/Germany/Greece/Iceland/Ireland/Italy/Luxembourg/Netherlands/Norway/Portugal/Spain/Sweden/Switzerland/U.K.

Copyright © 2006 RISO KAGAKU CORPORATION
Welcome to the world of this product!
This machine is an ink jet printer for high-speed full-colour printing that supports network. This printer allows various functions such as data output and printer monitoring to be used from Windows and Macintosh computers.

The following three manuals are provided for this machine.
• HC5500 Series User’s Manual for Printer Main Body (this manual)
• HC5500 Series User’s Manual for Printer Driver
• HC5500 Series User’s Manual for Console
• RISO HC5500 Navigation Book

Before using this machine or when something is not clear during use, read the relevant manual to make good use of this machine for a long period.

About This User’s Manual
Riso shall not be responsible for any damage or expense that might result from the use of this manual. As we are constantly improving our products, the machine may differ in some respects from the illustrations used in this manual. Riso shall not be liable for any direct, incidental, or consequential damages of any nature, or losses or expenses resulting from the use of this product or included manuals.

About the Manuals
The following manuals are supplied with this machine.
• HC5500 Series User’s Manual for Printer Main Body
  Means this manual. This manual explains notes that should be known before starting operation of this machine, actual printing operation on the printer, and printer settings. This manual also explains the method of replacing consumables and troubleshooting.
• HC5500 Series User’s Manual for Printer Driver
  This manual explains the method of installing the printer and the installation procedure and the functions of the printer driver.
• HC5500 Series User's Manual for Console
  This manual describes the "Monitoring" function that is used for checking the printer status through a network.
• RISO HC5500 Navigation Book
  Explains useful functions and features in colour.
Notation of Explanation of Operation

The following symbols are used in this manual for description of functions, operation, and notes.

WARNING and CAUTION are cautions for safety. Be sure to read these items before using this machine.

Notation of Number of Sheets of Paper

In this manual, A4/85g/m² (22.6-lb bond) is used as a standard for description.

Example: Feed Tray 1 1,000 sheets

The value varies with the paper.
Safety Precautions

This section describes the items that should be followed for safe use of this machine. Be sure to read this section.

Warning Symbols

To use the machine properly and to prevent human injury and damage to properties, the following warning symbols are used. Read the meaning of the symbols to understand and then read this manual.

<table>
<thead>
<tr>
<th>WARNING</th>
<th>Indicates that incorrect handling by ignoring this symbol may cause death or serious human injury.</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAUTION</td>
<td>Indicates that incorrect handling by ignoring this symbol may cause human injury or damage to properties.</td>
</tr>
</tbody>
</table>

Example of icons

- The symbol indicates a prohibited action. A concrete prohibited action is drawn in the symbol or near the symbol. (The left figure shows prohibition of disassembly.)

- The symbol indicates a forced action or an instruction. A concrete instruction is drawn in the symbol. (The left figure shows an instruction to remove the power plug from the electrical outlet.)

Location for Installation

- **CAUTION**
  - Place the machine on a flat or stable surface. Otherwise, the machine might be inclined or fall down, resulting in human injury.
  - The machine has vent holes. Install the machine more than 100 mm (3 15/16”) away from the wall. If the vent holes are blocked, heat is not dissipated and a fire might occur.
  - Do not place the machine in a dusty or humid location. Otherwise, a fire or an electric shock might occur.
  - Do not place the unit in a location that is subject to water leak or water splashes. If water enters the unit, a fire or an electric shock might occur.

Power Connection

- **WARNING**
  - Install the machine near the wall socket to avoid using an extension cord between the machine and the wall socket. If an extension cord is absolutely required, do not use longer than 5m (15ft). Otherwise, a fire or an electric shock might occur.
  - Do not damage or rebuild the power cord. Placing a heavy object on the cord or pulling or bending forcibly the cord may damage the cord, resulting in a fire or an electric shock.
  - The power cord supplied with this product can be used only for this machine. Do not use it for another electric product. A fire or an electric shock might occur.
  - Do not plug or unplug the power cord if your hands are wet. Otherwise, an electric shock might occur.
CAUTION
- Do not pull the power cord when unplugging it. Otherwise, it could become damaged and a fire or an electric shock might occur. Be sure securely to hold on to the plug before unplugging it.
- If the machine is not used for a long time, for example due to consecutive holidays, unplug the power cord from the electrical outlet for safety.
- Pull out the power plug from the electrical outlet more than once a year and clean the prongs of the plug and their surroundings. Dust collected on these areas can result in fire.

Handling

WARNING
- Do not place water containers or metallic objects on the machine. If water drips inside the machine or a metallic object drops inside it, a fire or an electric shock might occur.
- Do not place any bare fire source such as candle on the unit.
- Do not insert or drop any metallic material or flammable substances into the machine through any opening. A fire or an electric shock might occur.
- Do not remove the covers. Otherwise, you might be electrically shocked by the high-voltage part inside.
- Do not disassemble or rebuild the machine by yourself. Otherwise, a fire or an electric shock might occur.
- If the machine emits excessive heat, smokes or foul odour, immediately turn off the power, unplug the electrical (power) cord and contact your service representative because a fire or an electric shock might occur.
- If something drops inside the machine, immediately turn off the Main Power Switch, unplug the electrical (power) cord and contact your service representative. If you continue using it, a fire or an electric shock might occur.

CAUTION
- Never stick your hands or fingers in the openings around the Standard Feed Tray and the Paper Receiving Tray during operation. Otherwise, human injury might occur.
- Ink may be stuck to the inside of the machine. Take care not to touch it with your hands or clothes. If your hands or clothes are stained with the ink, wash it off immediately with a detergent.
- When moving the machine, contact your service representative. If you try to move the machine by force, the machine might turn over, resulting in human injury.

Handling of Ink

CAUTION
- Avoid contact of ink with your eyes and skin. If ink gets into your eyes, flush it out immediately with plenty of water. If ink comes into contact with your skin, wash it off thoroughly with soap.
- Allow plenty of ventilation during printing. If you feel unwell during use, immediately move to a location with fresh air.
- If you feel sick, seek medical advice immediately.
- Only use the ink for printing purposes.
- When carrying the Ink Cartridge, hold its main body. Otherwise, the cap may be removed and the Ink Cartridge may drop, resulting in stain on your hands or clothes.
- Do not put a used Ink Cartridge into fire. Since the ink is flammable, a flame may become large, resulting in a burn.
- Keep the Ink Cartridge out of the reach of children.
This section explains precautions you have to observe when using the machine.

**Location for Installation**

- The location for installation is determined based on consultation with the customer at the time of delivery.
- Contact your service representative before moving the machine.
- Avoid installing the machine in the locations listed below. Failure to observe this precaution may lead to machine failure or human injury.
  - Locations that are subject to sudden temperature change.
  - Extremely hot and humid locations or cold and dry locations
  - Heated locations or locations to exposed to direct cold air, direct hot air, or direct radiant heat
  - Badly ventilated locations
  - Dusty locations
  - Locations that are subject to frequent vibration

**Operation Environment**

- Install the machine in a location of which the levelness meets the following conditions.
  Front to rear: 3 mm (1/8") or less
  Side to side: 3 mm (1/8") or less
- Appropriate environment conditions are shown below.
  Temperature range: 15°C - 30°C (59°F to 86°F)
  Humidity range: 40% - 70% (noncondensing)

**Overall Dimensions**

Space for extending the Standard Feed, Paper Receiving and space for pulling out Feed Trays are required.

- The dimensions are expressed in mm.

![Front view](image1)

- Front view

![Side view](image2)

- Side view
Handling of The Machine

- Do not turn off the Main Power Switch or unplug the electrical (power) cord during operation.
- Do not open any covers during operation.
- Do not move the machine.
- The machine has precision parts and driving parts inside. Do not handle the machine in other ways than described in this manual.
- Contact your service representative before moving the machine.
- Do not place heavy objects on or apply shocks to the machine.
- Be sure to open and close any cover gently.
- When turning off the Main Power Switch of the machine and then turning it on again, wait more than 10 seconds before turning it on.
- If the machine will not be used or has not been used for a long time, be sure to perform Ink Head Maintenance (normal cleaning). Otherwise, deterioration or drying of ink occurs in the ink transfer path inside the machine, resulting in clogging at the head. To prevent this problem, periodic use is recommended.
- Never touch the print head because a failure or deterioration of images may occur.
- Be sure to use always the machine with the four ink cartridges mounted. Even if some ink cartridge is not used, do not leave the machine with an ink cartridge removed.

Handling and Storage of Ink Cartridge

- Do not shake the Ink Cartridge before use. Air bubbles may occur, resulting in defective printing.
- Do not add ink into the Ink Cartridge.
- If ink remains for a long time after the cartridge is opened, the ink may be deteriorated because of various components contained in the air. Use of deteriorated ink may cause a failure of the print head or the ink transfer path.
- The injection characteristic of the ink jet printer varies with viscosity of the ink. At a low temperature, particularly, the viscosity increases and clogging of the print head may occur. Observe the operation environment and storage temperature, and use the ink earlier checking the date of manufacture.
- The adequate operation temperature of the machine is 15°C - 30°C (59°F to 86°F) Use of the machine out of the adequate temperature range may cause defective printing (decrease of discharge).
- Do not release the ink left in the cartridge into a sewer.
- Do not keep Ink Cartridge with its nozzle downward.
- Store under conditions which avoid freezing or direct sunlight, and temperatures of 5°C (41°F) or lower, and 35°C (95°F) or higher. Also use the ink earlier checking the date of manufacture.

Handling and Prints of Paper

- Be sure to load paper that is not curled.
- Be sure to store unused paper to avoid humidity by wrapping it with packing paper.
- In duplex printing, the edges of paper may be stained depending on the original.
- Prints are discoloured by influence of various components in the air and light. If prints are dried sufficiently and then put in a frame with glass or is laminated for storage, discolouration becomes small.
- When storing prints in a clear file, use a file made of PET.
- Prints are decolourized by moisture or sweat. Avoid storage in a location exposed to waterdrops. Also writing with an oil-based pen may cause bleeding.
- The printing density differs between prints immediately after printing and those 24 hours after printing. Note that the density decreases as the time elapses.
- Do not stack prints on other prints that are output with a laser printer or a copier that uses toner. Paper may be stuck to the portions printed with toner or toner may be transferred to the prints.
- Store paper flat avoiding high temperature, high humidity, and direct sunlight. Note that the curled paper cannot be used.
Disposal of Ink Cartridge and Ink Drain Tank

- The ink may leak through the ink feed opening of the cartridge. When returning, attach the cap and put the cartridge into the inner bag and the packing material.
- Used Ink Cartridges and Ink Drain Tanks are collected by a service representative. After use is complete, close the cap securely.
- Ink in the ink drain tank cannot be used for printing. A failure or trouble may occur.

Print Area (Image Area)

Regardless of the original paper size, printing cannot be performed on a part of paper along the sides of the paper. Since use of paper of the same size as the original leaves margins, the full area of the paper is not used for printing.
To print an original on which characters or figures occupy the full area, reduce the full area of the original and then perform printing.

When printing onto an envelope, the print area is different. Refer to "Printing onto Envelope." p.1-20

Guaranteed Print Area (Image Area)
Printing can be performed into the area 5 mm (3/16") inside from the sides of paper.
Maximum Print Area (Image Area)

When an original is scanned through the optional scanner, printing can be performed into the area inside 1 mm (0.04") from
the sides of paper but deterioration of print quality such as loss of characters or figures and bleeding may occur depending on
the original.
Even if the paper size is larger than 316mm × 460mm (12\text{\textfrac{7}{16}}" \times 18\text{\textfraction{1}}{8}"), the actual maximum printable area is 314mm ×
458mm (12\text{\textfrac{3}{8}}" \times 18\text{\textfrac{5}{16}}").

• “4.10 Image Area” of the menu setting must be set. “4.10 Image Area” p.2-29
• Depending on the application, it may not be possible to make a margin of 1 mm (0.04") width along the edges of paper. (In most
application software, margin width of 5 mm (\textfrac{3}{16}) is required.)

Materials Not to Be Printed

Do not use the machine in any manner which violates the law or infringes on established copyrights, even when making copies
for personal use. Consult your local authorities for further details. In general, use discretion and common sense.

Power Connection

● Connect the power plug securely to the electrical outlet to avoid improper connection.
● Install the machine near the electrical outlet.
● If an optional device is connected to an electrical outlet for option connection on the machine, the optional device is turned on
and off at the same time as the machine.
● Use only the power cord supplied by the seller of the controller, or use a cord that is earthed, not longer than 4.5m, rated not
less than the controller is rated, and authorized by the state or region where it is used.

Sleep

When the machine is on and is not used for a certain time, the machine enters automatically the energy saving mode. Two types
of energy saving mode are provided: Stand-by mode and Sleep mode.
• Stand-by mode: Power consumption is 150 W or less.
  When data is received from a computer, the machine enters the print mode.
  To turn on the print mode from the operation panel of the printer, press the WAKE-UP Key.
• Sleep mode: Power consumption is 200 W or less.
  To enable reception of data, perform startup operation from a computer.
  To start up from the operation panel of the printer, press the Sleep Key.
The energy saving function is set in “Menu 5  Administration” on the operation panel.
If the machine is not used for a long time, turn off the Main Power Switch and remove the power plug from the electrical outlet.
(When the Main Power Switch is turned off, the power consumption becomes 0 W.)
Connecting to a Computer

The machine is connected to a computer through network.

- When connecting the machine to multiple computers:

![Diagram showing connection to multiple computers](image)

- When connecting the machine to a single computer:

![Diagram showing connection to a single computer](image)

⚠️ The allowable voltage for all input/output connections is 5V.

💡 Use a commercially available S/UTP cable (shielded or non-shielded twisted pair cable) as a LAN cable.
RISO, the environment and the Waste Electrical and Electronic Equipment Directive “WEEE Directive”

**What is the WEEE Directive?**
The purpose of the WEEE Directive is to reduce waste and ensure Electrical and Electronic Equipment is recycled at the end of its useful life.

What does the crossed out wheeled bin symbol mean?
The crossed out wheeled bin symbol indicates this product must be disposed of separately to normal waste. Please contact your RISO service agent for information about disposal.

What does the solid bar symbol mean?
The solid bar under the crossed out wheeled bin indicates this product was put on the market after the 13th August 2005.

Who should I contact if I want more information about the WEEE Directive?
You should contact your local RISO service agent for more information.
Chapter 1 Basic Information on Printing ............. 1-1
Describes names and functions of parts of the printer, preparation for printing, and general printing operation.

Chapter 1  Basic Information on Printing

This section describes names and operation of parts that should be known for using the printer and general printing operation.
Names of Parts

Printer Main Body

Ink Unit

Black (K) Ink Cartridge
Cyan (C) Ink Cartridge
Magenta (M) Ink Cartridge
Yellow (Y) Ink Cartridge

Left Transfer Path Cover

Paper Feed Pressure Adjustment Lever  Page 1-13
Adjusts pressure for paper feed according to the paper type.

Feed Tray Descent Button  Page 1-14
Used to raise or lower the Standard Feed Tray for replacement of paper or adding paper.

Feed Tray Paper Guide
Prevents paper from shifting in the Standard Feed Tray.

Standard Paper Feed Tray  Page 1-12
Load paper here. Approximately 1,000 sheets can be loaded at a time.

Transfer section door
Ink Cover  Page 3-16
Open to replace an ink cartridge.

Main Display  Page 1-5
Use to set the printer and check the status.

Front Cover
Open when a paper jam occurs.

Maintenance Door
Service personnel opens this door for maintenance.

Paper Feed Tray  Page 1-11
Set paper here. Paper Feed Tray 1 (upper feed tray) holds approximately 1,000 sheets. Paper Feed Tray 2 (lower feed tray) holds approximately 500 sheets.

Paper Feed Pressure Adjustment Dial  Page 3-20
Adjust if improper paper feed such as double feed occurs.
When removing printed paper from the Paper Receiving Tray, press this button to spread the Stack Guides for easy removal.

The guides to be spread can be set. For details, refer to "4.8.4 Shifting Guide" of the menu setting. p.2-27
The Control Panel includes a message display, setting and trouble display, and operation keys. For description of each display and detailed operation methods, refer to "Chapter 2 Printer Configuration" p.2-1.

**FORCEJET™ Link symbol**  
Page 3-3

**Message Display** Page 2-2  
Displays the printer status, description of an error, setting items, etc.

**Remaining Volume Notice Indicators**  
Lights up when ink or paper is low.

**WAKE-UP key** Page 1-9  
Restores the printer from the sleep mode.

**Use to perform printer setting.**  
Page 2-4

**PRINT/PAUSE Key**  
Switches between the status where the printer is ready for printing (print mode ON) and the status where the printer is not ready (print mode OFF).

**Sleep Key**  
Turns on or off the sleep mode.

Indicates the description and location of an error when a paper jam occurs inside or a cover is not securely closed.  
Page 3-3
Preparing to Print

After connection of the printer to a computer or network is complete, prepare paper and the Paper Receiving Tray for printing.

### Usable Paper

This section describes usable paper and unusable paper. Use of paper that is not adequate for the printer may cause paper jams, stains or a failure. Use paper that conforms to the following specifications.

⚠️ The print quality differs depending on the paper type. Use recommended paper adequate for HC5500. For details, contact your dealer.

### Basic Specifications of Paper

Paper that conforms to the following restrictions can be used for printing.

- **Paper weight**
  
  | For Standard Paper Feed Tray | 46g/m² - 210g/m² (12-lb bond to 56-lb bond) |
  | For Paper Feed Trays | 52g/m² - 104g/m² (14-lb bond to 28-lb bond) |

- **Paper Sizes That Can Be Used in the Standard Feed Tray**

  - Minimum size:
    - 90mm (3⅓")
    - 148mm (5⅞")

  - Maximum size:
    - 297mm (11")
    - 420mm (17")

  - Registering Paper Size:
    - 297mm - 340mm (11" - 13⅔")
    - 420mm - 550mm (17" - 21⅝")

  - Paper ejection direction:
    - 90mm (3⅓")
    - 420mm (17")

*When using an envelope, set it in the Standard Feed Tray. "Printing onto Envelope" p.1-20*

### Registering Paper Size and Paper Type

If non-standard size paper or paper larger than A3/Ledger is used in the Standard Feed Tray, the paper size and the paper type must be registered in advance.

- "5.1 Paper Size Entry" p.2-32
- "5.2 Paper Type Entry" p.2-33

When using paper larger than the A3/Ledger size, set "4.8.2 Stack Guide" of "4.8 Paper Ejection" of the menu setting to "OFF" and fold the stack guides before printing. "4.8.2 Stack Guide" p.2-26
Paper Sizes That Can Be Used in Paper Feed Tray 1/Paper Feed Tray 2

Registering Paper Size and Paper Type
If non-standard size paper is used in Feed Tray 1/Feed Tray 2, the paper size and the paper type must be registered in advance.

- **5.1 Paper Size Entry** p.2-32
- **5.2 Paper Type Entry** p.2-33

If a registered paper size is not adequate for the feed tray, the paper will not be displayed as a choice in the menu setting.

Note that even if "paper size" and "paper weight" conform to the specifications of this machine, paper may not be properly fed depending on the paper type, environment, and storage conditions. For details, contact your local dealer (or service representative).

Unavailable Paper

Do not use paper shown below because it may cause paper jams.
- Paper thinner than specified in the basic specifications
- Paper thicker than specified in the basic specifications
- Chemically treated or coated paper (such as thermal or carbon paper)
- Warped paper
- Wrinkled paper
- Folded paper
- Torn paper
- Curled paper (Curled is 3mm (1/8") or more)
- Front or back coated paper such as art paper and commercially available paper for ink jet printer
- Paper with serrated edge
- Paper with adhesive
- Paper with holes
- Commercially available matted paper
- Glossy paper for photo
Handling of Paper

- For printing paper, use recommended paper wherever possible. Recommended paper allows high-quality printing that makes full use of the printer performance and the characteristics of ink.
- When loading paper in the Standard Feed Tray, be sure to use paper that has not been unpacked. After completing printing, store paper left in the Standard Feed Tray by wrapping it with packing paper. If the paper is left in the Standard Feed Tray, the paper may be curled, resulting in paper jams.
- When using badly cut paper or rough surface drawing paper, fan the paper sufficiently before use.
- Store paper in a dry location.
Power Switch

Main Power Switch and Sleep Key

The Main Power Switch is used to turn on or off the whole printer. If the printer is not used for a long time, for example due to consecutive holidays, turn off the Main Power Switch.

Turn on or off the Sleep key when starting or terminating daily work. If this unit is not used for a certain time with the Sleep Key on, this unit automatically enters the sleep mode for suppressing power consumption. "5.8 Initial Setting" p.2-45

• When Turning on the Power:
  Turn on the Main Power Switch and then press the Sleep Key.

• When Turning off the Power:
  Press and hold down the Sleep Key more than approximately one second and turn off the Main Power Switch after message "Shutting Down" on the message display disappears. When turning on the Main Power Switch again, wait more than 10 seconds.

- Power ON/OFF status can be checked with the colour of the Sleep Key.

Main Power Switch ON (starting)
Sleep Key: Lit green
WAKE-UP Key: Not lit

Main Power Switch ON (sleeping)
Main Power Switch ON (before starting)
Sleep Key: Lit orange
WAKE-UP Key: Not lit

Main Power Switch ON (stand-by mode)
Sleep Key: Lit green
WAKE-UP Key: Lit

Main Power Switch OFF
Sleep Key: Not lit
WAKE-UP Key: Not lit
Loading Paper

The method of loading paper in the Paper Feed Trays and the Standard Paper Feed Tray is described below.

Number of Sheets That Can Be Loaded

The number of sheets that can be loaded in the Feed Trays and the Paper Feed Tray are shown below. The number of sheets that can be loaded varies with the thickness of paper.

*When 85g/m² (22.6-lb bond) is used:

<table>
<thead>
<tr>
<th>Tray</th>
<th>Capacity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper Feed Tray 1</td>
<td>1,000 sheets</td>
</tr>
<tr>
<td>Paper Feed Tray 2</td>
<td>500 sheets</td>
</tr>
<tr>
<td>Standard Paper Feed Tray</td>
<td>1,000 sheets</td>
</tr>
</tbody>
</table>

Paper to Be Loaded in the Standard Paper Feed Tray

When using paper shown below for printing, load the paper in the Standard Paper Feed Tray with the print face up.

- Special paper such as thick paper
- Paper for which printing has been performed onto the back side
- Paper larger than A3/Ledger size
- Paper smaller than B5 size such as postcard
- Envelope

Registration of the paper

After loading paper in the Standard Paper Feed Tray / Paper Feed Tray 1 / Paper Feed Tray 2, you must register the characteristics of the paper. For registration, use “4.1 Standard Feed Tray” / “4.2 Feed Tray 1” / “4.3 Feed Tray 2” of the menu setting according to the location of paper setting.

The details of setting are shown below.

- Paper size
- Paper type
- Double feed check

When loading paper for which printing has been performed onto the back side, envelopes or paper with a dark ground colour, select "OFF."

If these items are not set properly, when printing directed, the printer may judge that no paper is loaded and may not print appropriately. Be sure to register these items.

"Menu 4  Configuration” p.2-18
1 Pull out the Paper Feed Tray until it stops.

2 Turn down the Side Guide Locking Levers to the "FREE" positions and spread the guides to the outermost positions.

3 Adjust the Paper Top Guide to the paper size.
   - First, remove the Paper Top Guide. While pressing the release buttons in the direction shown by the arrow, remove the stopper just above.
   - Then, set the Paper Top Guide. While pressing the release buttons, insert the Paper Top Guide by adjusting the ▼ mark of the Paper Top Guide to the position of the paper size to be set.

4 Load paper by positioning the centre of the paper to the centre mark (▼) inside the Paper Feed Tray.
   - If the front side quality is different from the back side quality, load paper with the print face down. Do not exceed the upper limit label.
   - Take care the paper is not bent at the Paper Top Guide.

5 Adjust the guides to the paper size.
Slide the guides to adjust to the paper width and turn down the Side Guide Locking Levers to the "LOCK" positions to secure the guides.

6 In the menu setting, set the size, paper type, and double feed check.
Use "4.2 Feed Tray 1" and "4.3 Feed Tray 2" of Menu 4 for the setting.
"Menu 4 Configuration" p.2-18
When loading paper with a dark ground colour, set "Double Feed Check" to "OFF."

Loading Paper (Standard Paper Feed Tray)

1 Open the Standard Paper Feed Tray in the direction shown by the arrow until it stops.

2 Load paper.
Load paper according to the indication of the Standard Paper Feed Tray.
Load the paper with printing side up.

3 Adjust the Feed Tray Paper Guides to the paper size.
Slide the Feed Tray Paper Guides to adjust to the paper width and turn down the Feed Tray Paper Guide Levers to the "LOCK" positions to secure the guides.

4 In the menu setting, set the size, paper type, and double feed check.
Use "4.1 Standard Feed Tray" of Menu 4 for the setting.
"Menu 4 Configuration" p.2-18
When setting paper for which printing has been performed onto the back side or paper with a dark ground colour, set "Double Feed Check" to "OFF."
Paper Feed Pressure in Standard Paper Feed Tray

In the Standard Paper Feed Tray, the paper feed pressure can be adjusted with the Paper Feed Pressure Adjustment Lever according to the paper that has been loaded. Set the lever to "(*) (NORMAL)" or "(**) (CARD)" according to the paper quality. If "(**) (CARD)" is selected, paper is fed with higher pressure.

Paper Feed Pressure Adjustment Lever and Paper

Supported paper qualities are shown below.

<table>
<thead>
<tr>
<th>Lever position</th>
<th>Paper quality</th>
<th>Supported printing paper</th>
</tr>
</thead>
</table>
| [* (NORMAL)]  | Standard or Thin/Light| • Fine
              |                       | • RISO PAPER IJ
              |                       | • RISO PAPER IJ MATTE
              |                       | • RISO IJ Double-Sided Matte Paper
              |                       | • Commercially available copy paper |
| [* (CARD)]    | Card or Special       | • Drawing paper (*)
              |                       | • Postcard (*)
              |                       | • Envelope (*)

*If paper is not fed properly, set the lever to "(*) (NORMAL)."
When adding paper of the same size or replacing it with paper of a different size, use the Feed Tray Descent button. If all sheets of paper is removed from the Standard Feed Tray, the tray lowers automatically.

1 **Press the Feed Tray Descent Button to lower the Standard Feed Tray.**

Press and hold down the button until the tray lowers to the desired position.

2 **Add or replace the paper.**

If feed tray relay is set:

- In this unit, paper feed can be performed sequentially from Feed Tray 1, Feed Tray 2, and the Standard Feed Tray for high-volume printing if the same size of paper is loaded in these feed trays.
- If feed tray relay is set, load paper of the same size, same paper quality, and same paper type in these feed trays.

"4.5 Triple-Tray Source" p.2-22  "4.4 Feed Tray Relay" p.2-21

When you replace paper with different one, change "4.1 Standard Feed Tray" of the menu setting.

**How to Close the Standard Feed Tray**

With the power on, remove the paper from the Standard Feed Tray, spread the Feed Tray Paper Guides, and close the Standard Feed Tray.

⚠️ After checking that the Standard Feed Tray is at the lowermost position, close it.

- If you turn off the printer power before removing paper, the Standard Feed Tray does not lower.
Setting Up the Paper Receiving Tray

Set the Paper Receiving Tray.

Adjusting the Side Guides and Rear Guide Positions
The Side Guides and the Rear Guide move automatically to the optimum positions according to the printing paper size. Fine position adjustment can be performed on the Control Panel. For details, refer to "4.8 Paper Ejection" p.2-25 of the menu setting.

1 Open the Paper Receiving Tray in the direction shown by the arrow until it stops.

2 Raise the Side Guides.

3 Adjust the Arrangers.
Normally, when printing onto B4 or larger paper, take out the Paper Arrangers. Paper arrangement depends on the paper firmness and so on. Adjust the Paper Arrangers as needed.

4 Raise the End Guide.

5 Adjust the position of the End Guide Cushion.
Use the Paper Feed Pressure Adjustment Lever to set the cushion to [NORMAL] or [CARD] according to the paper quality.
Do not pull out the Cushion from the Cushion Stand.
"Paper Feed Pressure in Standard Feed Tray" p.1-13

When printing onto paper larger than 320 x 432 mm (12 5/8" x 17"), fold all the guides.
At this time, set "4.8.2 Stack Guide" p.2-26 of the menu setting to "OFF."
Close the Paper Receiving Tray as described below.

1. **Check that no print remains and press the [Stack Guide Open Button].**
   The Stack Guide (side) and the Stack Guide (End) move to their storage positions.

2. **Turn down the Stack Guide (End) inward and fold it.**

3. **Fold the Arrangers.**

4. **Turn down the Stack Guide (Side) inward and fold them.**

5. **Close the Paper Receiving Tray.**
Basic Printing Operation

After connection and preparation are complete, perform trial printing. This section describes the basic operation method of “Direct Printing”, namely printing data created in the computer without storing data in the printer.

- Required software must be installed in the computer in advance.
  For details, refer to the separate "HC5500 Series User’s Manual for Printer Driver."
- Check that the printer is on and the consumables are set before printing.

Print Operation Flow

1. Open the file to print on the computer.
2. Set the print condition at the [Print] dialog box.
3. Print.

Printing from the Computer (Windows)

This section describes a print instruction using RISO Controller HC3R-5000 from Microsoft Word 2000 as an example.

1. Check that the printer and the computer are turned on.
   If the printer is in the sleep mode or if the RISO console screen cannot be displayed on the computer, use the RISO Wakeup Tool to start the printer and then carry out steps 2 and after.
   For details, refer to separate "HC5500 Series User's Manual for Printer Driver."

2. Open the file to print.
   Start the application software to open the original data file to print.

3. Display the [Print] dialog box.
Select [Print] from the [File] menu.

4 Check the [Printer name].
As the printer name, select the name set when the printer driver was installed.

5 Check the following items.
- Print range
  Specify the page range of data to be printed.
- Output volume
  Specify the output volume for original data with a number.

⚠️ Be sure to clear the checkmark.
Even for collated printing, clear the checkmark at [Collate.]

If you click the [Properties] button, you can set the various conditions on the printer driver screen. The settings of [Original image] on the [Main setting] tab and [Paper type] on the [Main setting] tab affect seriously the print quality. When using conditions other than the default settings, click the [Properties] button and adjust the settings.
*Chapter 2 Printer Driver Operation for HC3R-5000* of "HC5500 Series User's Manual for Printer Driver" p.2-1
*Chapter 3 Printer Driver Operation for PS7R-9000/5000" of "HC5500 Series User's Manual for Printer Driver" p.3-1

Print data can be protected with the security function.
*HC5500 Series User's Manual for Printer Driver" *Chapter 2 Printer Driver Operation for HC3R-5000" p.2-27
*Chapter 3 Printer Driver Operation for PS7R-9000/5000" p.3-27
6 Click the [OK] button.

When the printer receives data sent from the computer, the DATA indicator blinks and message "Receiving Data" is displayed on the Display. When reception is complete, the DATA indicator lights up, message "Printing" is displayed, and printing starts. p.2-2

If a message indicating that printing cannot be performed is displayed on the screen, the printer may be in the sleep mode. Press the Sleep Key on the operation panel of the printer or use the Wakeup Tool from the computer to start the printer.

7 Press the Stack Guide Open Button and remove the prints from the Paper Receiving Tray.

If the button is pressed, the Stack Guides is spread to allow easy removal of prints.

The guides to be spread when the Stack Guide Open Button is pressed can be selected. "4.8.4 Shifting Guide" p.2-27
You can perform printing onto commercially available envelopes. This section describes notes for printing onto an envelope and the printing procedure.

- When using envelopes, set "5.1 Paper Size Entry" and "5.2 Paper Type Entry" of the menu setting. At this time, be sure to set the "Paper Type Entry" to "Envelope."
- Be sure to set envelopes in the Standard Feed Tray. Up to 100 envelopes can be set at a time. (The maximum height is 100 mm.) Also follow the orientation of envelopes. If envelopes are set in an incorrect orientation, an envelope may jam in the printer or the print head may be damaged. If the orientation of the data created on the computer is different from the orientation of the envelopes in the tray, set the orientation on the printer driver.
- Set the envelopes in the Standard Feed Tray with the flaps spread. (Do not bend the flaps.)
- Perform the setting as follows:
  - Set the Paper Feed Pressure Adjustment Lever to "CARD."
  - Set "4.1.2 Paper Type" of the menu setting to "Envelope."
- When printing onto envelopes, the following functions cannot be used.
  - Duplex printing
  - Facedown printing set by the printer driver
  - Optional finisher functions

### Preparation for Printing

Set "4.1 Standard Feed Tray" of the menu setting.

<table>
<thead>
<tr>
<th>Paper Size</th>
<th>Registered Paper Size 1 - 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper Type</td>
<td>Envelope</td>
</tr>
<tr>
<td>Double Feed Check</td>
<td>OFF</td>
</tr>
</tbody>
</table>

### Envelope Size and Maximum Print Area (Image Area)

For printing onto envelopes, "Paper Size Entry" is required. Register the envelope size (length) that includes the flap.

The Maximum Print Area (Image Area) for envelopes is different from the area for normal paper and is the area inside 10 mm (3/8") from the edges of the registered size.

When creating data for printing onto envelopes, take care so that the print area does not protrude from the flap of the envelopes. If original data is printed in the areas indicated with oblique lines, the belt inside the printer becomes dirty, resulting in trouble.
How to Print

1 Set “4.1 Standard Feed Tray” of the menu setting to “Envelope.”

“4.1 Standard Feed Tray” p.2-19
“Preparation for Printing” p.1-20

Change the position of the Standard Feed Tray.

2 Lower the Standard Feed Tray to the lowest position and open the paper guides fully.

3 Raise the end of the Standard Feed Tray and hang the stopper roller in the main unit side on the hook.
The Standard Feed Tray is fixed in an inclined state.

4 Set the envelopes in the Standard Feed Tray.

Set the envelopes with the flap on the left side.

5 Adjust the paper guides according to the envelopes and lock them.

6 Set the Paper Feed Pressure Adjustment Lever to [¥ (CARD)].

7 From the computer, open the file to print.

8 Display the [Print] dialog box.

From the [File] menu, select [Print].

9 Click the [Properties] button.

12 Click the [OK] button.

The printer driver screen is closed.

13 Click the [OK] button in the [Print] dialog box.

Printing starts.
If a check mark is placed at [Pause after a proof] in step 10, printing stops temporarily after one copy is printed. Check the print result and then press the PRINT/PAUSE key.

- If the envelopes cannot be fed properly, return the Paper Feed Pressure Adjustment Lever to [NORMAL] and perform printing.
- If double feed or misfeed occurs frequently, adjust the front end of the envelopes (to be fed first) down and set them in the Standard Feed Tray.
When Printing is Complete

Return the Standard Feed Tray to the original position.

1. Lower the Standard Feed Tray to the lowest position and open the paper guides fully.

2. Raise the Standard Feed Tray so that the angle from the horizontal plane exceeds 45 degrees and release the stopper roller from the hook.

3. Gently return the Standard Feed Tray to its original position.

If you set another type of paper in the Standard Feed Tray, change the setting of "4.1 Standard Feed Tray" of the menu setting.
Chapter 2  Printer Configuration

This chapter describes the status of the Operation Panel that is displayed during printing. Also this chapter describes the method of setting the printer using the Operation Panel. After sending data to the printer, you can adjust the print position and perform test printing.
This section describes the meaning of each display in the Message Display and operation keys.

Message Display

In the Message Display, a message indicating printer operation status is displayed. Principal display items and locations are shown below.

**During Printing**

- **Data indicator**
  - Blinks when the printer is receiving print data from a computer.
- **Status**
- **Print Quantity Display**
- **Duplex Indicator**
  - Displayed when duplex printing is selected.
- **Original size / Tray Display**

**In Menu Setting**

When "Ready" is displayed or the Printing mode is off, pressing the MENU Key displays the menu setting screen. For details, refer to "How to Use the Operation Panel" (p.2-5).

- **Menu number**
- **Menu name**
- **Pressing the key switches the screen to the next menu.**
When an Error Occurs

When an error occurs, an error number and its description are displayed in the Message Display. For error numbers, refer to "Chapter 3 Troubleshooting" on p.3-1.

⚠️ Status
The status of the printer is displayed. The following messages are displayed.

<table>
<thead>
<tr>
<th>Message</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Please Wait a Moment</td>
<td>The printer is warming up or is being restored from an error. Printing cannot be performed.</td>
</tr>
<tr>
<td>Warming Up</td>
<td>The printer is warming up because the temperature of the print head is low.</td>
</tr>
<tr>
<td>Ready</td>
<td>The printer is ready to receive data.</td>
</tr>
<tr>
<td>Receiving Data (The Data Indicator blinks.)</td>
<td>The printer is receiving data for printing from a computer.</td>
</tr>
<tr>
<td>Printing Mode Off</td>
<td>The printer is waiting for a print instruction from the Operation Panel.</td>
</tr>
<tr>
<td>Printing</td>
<td>The printer is printing or processing data.</td>
</tr>
<tr>
<td>Cooling Down</td>
<td>The printer is cooling down because the temperature of the print head is high.</td>
</tr>
<tr>
<td>Shutting Down</td>
<td>The printer shuts down.</td>
</tr>
</tbody>
</table>

⚠️ Print Quantity Display
The number of printed copies and the preset number of copies for printing are displayed.
For collated printing, the preset number of sets and the number of printed sets are displayed. For non collated printing, the preset number of sheets and the number of printed sheets are displayed.

⚠️ Duplex Display
This display appears when duplex printing is set.

⚠️ Original Size/Tray Display
The selected tray and the size and the orientation of the papers are displayed.
If a feed tray is specified individually, the specified tray is displayed.
If automatic selection of a feed tray is set, "Auto" is displayed, and during printing, the paper size is displayed.
If mixed sizes of originals are set, the largest size is displayed.
The functions of the keys are shown below. One key may have more than one function.

**PRINT/PAUSE Key**
- Turns on or off the Printing mode. When the Printing mode is on, the indicator is lit, and when the Printing mode is off, the indicator is not lit.
- If the key is pressed once during printing, printing stops temporarily. While printing stops temporarily, the indicator blinks. If the key is pressed again, printing resumes.
- If proof copy is instructed, after proof copy is printed, the printer stops temporarily and the indicator blinks. After adjustment and setting are performed as needed, when the PRINT/PAUSE key is pressed, printing starts.

**MENU Key**
- Press to change the printer initial settings or to exit setting.
- If pressed during menu selection, menu setting is cancelled and the Printing mode is turned off.

**Cursor Keys**
Use to display the desired menu or change a preset value.
- (Vertical Movement Keys) … Switch the menu or change the selected value.
- (Horizontal Movement Keys) … Move to another number on a number entry screen.

**OK Key**
Determines the preset content.

**CANCEL/BACK Key**
- If pressed during menu selection, the current setting is cancelled and operation returns to one more higher level.
- Press to cancel the function of which the setting is currently performed in a menu.
You can set or change the printer environment such as print position and paper type registration using the MENU Key of the Operation Panel.

### Items That Can Be Set from the Menu

The item that can be set from the menu and the details of each setting are shown below. **AAA** indicates the factory default setting.

<table>
<thead>
<tr>

* If US English is selected, inch system units and paper sizes will be displayed.
How to Enter the Menu

Set the menu when the printer is not operating, for example, when printing is suspended or the printer is waiting for data. To perform setting when the printer is printing, press the PRINT/PAUSE key to suspend printing (turn off the Printing mode) and press the MENU Key.

When the printer enters the menu, the Menu 1 screen appears.
The menu has a tree-type hierarchical structure. Press the \( \text{[A]} \) or \( \text{[V]} \) key to display the desired menu.

- **Submenu**
  Menu4 “The Configuration” and Menu5 “Administration” include submenus.

If you press the OK Key when a menu is displayed, its submenu will be displayed.

- The original menu name is displayed.
- The class of the sub menu is displayed.
  In this screen, it expresses that it is the 1st menu in menu 4.
- The name of submenu is displayed.

In some menus, the submenu has multiple levels.

- It expresses that it is the 2nd class submenu.

A * mark is displayed at the currently set items or values.

- It expresses that it is the current setting.
To display "4.1.1 Paper Size", operate as follows.

The menu hierarchy is listed at the end of this manual. Refer also to the list.
Menu Setting

Select the desired menu and press the OK Key.

Menu setting can be performed. Press the ▲ or ▼ key to select the desired item and press the OK Key.

Suspending the Operation

To return to the upper level from a submenu, press the CANCEL/ BACK Key.
To cancel and exit the setting, press the MENU Key.

Exiting the Menu Setting / Starting Printing

After menu setting is complete, press the PRINT/ PAUSE Key to turn on the Printing mode.
Adjusts the print position.
Also the positions can be adjusted for punching and stapling after printing.

**Adjustable Range**
If you want to shift the print position after checking the printed sheet, use the Cursor Keys on the printer to shift the position.

- With reference to the current print position, you can shift the position between 0mm and 20 mm (0" and 13/16") in the vertical (up and down) and horizontal (to the right and the left) directions.
- You can adjust the position in 0.5 mm (0.02") increments.

- If "4.9 Temp Data Clear" of the menu setting has been executed or if setting of no temporary data has been selected (5.8.6 Temporary Data Retention), message "No Temp Data" is displayed.
- In duplex printing, the print position moves to the same adjusted position on both the front and back sides. This function is useful for making margins for binding.
- The setting is effective in additional printing performed with "Menu 3 Temp Data Retrieve."
1 Press the MENU Key.

2 Check that "Print Position Adj" is displayed.

<table>
<thead>
<tr>
<th>Menu 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Print Position Adj</td>
</tr>
</tbody>
</table>

3 Press the OK Key.

4 Press the \[\triangle\] \[\nabla\] \[\leftarrow\] \[\rightarrow\] keys to adjust the print position.

Only the arrow that corresponds to the pressed key is displayed and the relevant value changes.

<table>
<thead>
<tr>
<th>Print Position Adj</th>
</tr>
</thead>
<tbody>
<tr>
<td>↑ 10.0 mm</td>
</tr>
<tr>
<td>←→ 00.0 mm</td>
</tr>
</tbody>
</table>

5 After setting is complete, press the OK Key.

When the screen in step 2 reappears, you can continue setting. Check the position using Menu 2 "Test Print."
To exit the setting, press the PRINT/PAUSE key.
Menu 2 Test Print

Prints the data currently retained in the printer for checking. Use this function to check to see if the settings such as print position and density adjustments are reflected properly.

- The number of printed sheets with the Test Print function is not counted as the "Number of Copies" that is set on a computer.
- If "4.9 Temp Data Clear" of the menu setting has been executed, message "No Temp Data" is displayed and Test Print cannot be performed.
- If an optional finisher is connected, test print paper is output to the Top Tray regardless of the settings of finisher functions.

1 Press the MENU Key.

2 Press the key to display "Test Print."

3 Press the OK Key.

4 Check the message and press the OK Key to print.

One sheet is printed. If the CANCEL/BACK key is pressed, the screen in step 2 reappears.

After Test Print is complete, you can continue setting. To exit the setting, press the PRINT/PAUSE key.
Menu 3  Temp Data Retrieve

The data currently retained in the printer can be retrieved and printed again by specifying the number of copies (additional printing).

⚠ Retained data can be retrieved if a check mark is placed at [Keep the last page of the job in the printer.] in [Controller setting 2] - [Initial setting] of [Administrator] of RISO Console. For details, refer to "HC-5500 Series User's Manual for Console."

- The retained data is the last page of the latest printing. In the case of duplex printing, the data of the last sheet (two pages) is retained.
- When the printer enters the sleep mode, retained data will be cleared (not retained).
- The maximum number of copies that can be set for additional printing is "9999."
- If "4.9 Temp Data Clear" of the menu setting has been performed, message "No Temp Data" is displayed.

1 Press the MENU Key.

2 Press the ⬆ or ⬇ key to display "Temp Data Retrieve."

3 Press the OK Key.

4 Press the ⬆ or ⬇ keys to move the cursor, and press the ⬆ or ⬇ keys to input the number of copies for printing.

5 Press the OK Key.

6 Press the PRINT/PAUSE Key.

Printing of the set number of copies starts.
Functions concerning printing such as size and type of paper to be loaded in the feed trays and the Job Separation function can be set.

Functions

The functions that can be set are shown below.

- **4.1 Standard Feed Tray**
- **4.2 Feed Tray 1**
- **4.3 Feed Tray 2**

Set the size and type of paper to be loaded in the Standard Feed Tray and the other feed trays and turn on or off the Double Feed Check function.

- **4.4 Feed Tray Relay**

Sets whether or not to enable the Feed Tray Relay function that uses Feed Tray 1 and Feed Tray 2. If "4.5 Triple-Tray Source" is set to "ON," feed trays including the Standard Feed Tray can be used for Feed Tray Relay.

- **4.5 Triple-Tray Source**

Sets whether or not to include the Standard Feed Tray into feed trays for selection when instructing printing without specifying the tray (Auto tray selection) from the printer driver.

- **4.6 Job Separation**

Inserts separation paper between jobs or every division such as set or page when printing multiple sets.

- **4.7 Print Density**

Selects the print density from five levels.

- **4.8 Paper Ejection**

Sets the adjustment of the Auto Stacking Tray and Eject Wing.

- **4.9 Temp Data Clear**

Clears temporary data in the printer.

- **4.10 Image Area**

Sets the maximum print area.

- **4.11 Cover Sheet Tray**

Sets the paper to be loaded in the Cover Sheet Tray of the optional HC Finisher.
4.1 Standard Feed Tray / 4.2 Feed Tray 1 / 4.3 Feed Tray 2

Set the size and type of paper to be loaded in the Standard Paper Feed Tray and the other Paper Feed Trays and turn on or off the Double Feed Check function.
Be sure to set when you have changed the type or size of paper.

</tbody>
</table>

*1 Sizes that have been registered in "5.1 Paper Size Entry" are displayed.
*2 Types that have been registered in "5.2 Paper Type Entry" are displayed.

An example of method of setting the Standard Feed Tray is used for explanation in the procedure below. For Feed Tray 1 or Feed Tray 2, display "Feed Tray 1" or "Feed Tray 2" in step 4.

1. Press the MENU Key.

2. Press the ▲ or ▼ key to display "Configuration."

3. Press the OK Key.

4. Press the ▲ or ▼ key to display "Standard Feed Tray."

5. Press the OK Key.
The submenu for the Standard Feed Tray (Feed tray) is displayed.
4.1.1/4.2.1/4.3.1 Paper Size

- To use non-standard size paper, register the size to be used in "5.1 Paper Size Entry" of the menu setting in advance. After the size is registered, paper of the size can be used.
- If you use non-standard size paper without paper size entry, a paper jam may occur.
- Paper sizes that can be set are different between the Standard Feed Tray and the other feed trays (1 and 2). p.2-19
- When setting for Feed Tray 1 /Feed Tray 2, if a registered size is not adequate for the feed tray, the registered paper will not be displayed.
- If an optional HC Finisher is connected, some paper sizes cannot be used. Paper sizes that cannot be used are not displayed in this menu.

1 Check that "Paper Size" is displayed.

2 Press the OK Key.

3 Press the or key to select the desired size.

4 Press the OK Key.

When the screen in step 1 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.

4.1.2/4.2.2/4.3.2 Paper Type

- Paper types that can be set are different between the Standard Feed Tray and the other feed trays. p.2-19
- When the registered paper is used in the Standard Feed Tray, adjust also the Paper Feed Pressure Adjustment Lever according to the paper thickness.

1 Press the or key to display "Paper Type."

2 Press the OK Key.

3 Press the or key to select the desired paper type.

4 Press the OK Key.

When the screen in step 1 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.
4.1.3/4.2.3/4.3.3 Double Feed Check

1 Press the ▲ or ▼ key to display "Double Feed Check."

2 Press the OK Key.

3 Press the ▲ or ▼ key to select ON or OFF.

4 Press the OK Key.

When the screen in step 1 reappears, you can continue setting. To exit the setting, press the PRINT/PAUSE key.

4.4 Feed Tray Relay

Sets whether or not to enable the Feed Tray Relay function that uses Feed Trays 1 and 2 and the Standard Feed Tray. Up to 2,500 sheets of printing can be performed continuously without adding paper.

Useful Feature
In the following cases:
The Feed Tray Relay function is useful in the following cases.

- Paper of the same size and type is always used. (*)
- More than 1,000 sheets of printing is performed at a time.

* When using paper of the same size and type, set "5.8.17 Tray Selection Rule" to "Size & Tray."

Mechanism of Feed Tray Relay
If you set Feed Tray Relay, when Feed Tray 2 becomes empty of paper, Feed Tray 1 will be automatically selected and printing will continue. In addition, if "4.5 Triple-Tray Source" is set to ON, the Standard Feed Tray can also be selected for paper feed with this function.
The order of priority of tray selection is Standard Feed Tray → Feed Tray 2 → Feed Tray 1.
"4.5 Triple-Tray Source" p.2-22

Settings

<table>
<thead>
<tr>
<th>OFF</th>
<th>Feed Tray Relay is disabled.</th>
</tr>
</thead>
<tbody>
<tr>
<td>ON</td>
<td>Feed Tray Relay is enabled.</td>
</tr>
</tbody>
</table>

The feed tray set for separation paper (5.3 Separation Paper) is not selected as a feed tray for Feed Tray Relay or Auto Tray Selection in "Menu 6 Feed Tray Selection." p.2-53.

1 Press the MENU Key.

2 Press the ▲ or ▼ key to display "Configuration."

3 Press the OK Key.

4 Press the ▲ or ▼ key to display "Feed Tray Relay."

5 Press the OK Key.

The submenu of Feed Tray Relay is displayed.
Press the ▲ or ▼ key to select ON or OFF.

Press the OK Key.
When the screen in step 4 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.

4.5 Triple-Tray Source

Sets whether or not to include the Standard Feed Tray into feed trays for selection when "Auto tray selection" is selected in "Paper feed tray" of the printer driver.

Useful Feature
Turn ON in the following cases:
• If you set paper of different sizes in the feed trays and the Standard Feed Tray respectively and perform printing by automatically selecting the desired paper from three different sizes according to the data.
• If you use paper in the Standard Feed Tray for "4.4 Feed Tray Relay" of the menu setting.

Turn OFF in the following case:
• If you set various types of paper such as postcards, envelopes, and card stock in the Feed Tray each time.

Settings

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>The Standard Feed Tray is not selected.</td>
</tr>
<tr>
<td>ON</td>
<td>The Standard Feed Tray is selected.</td>
</tr>
</tbody>
</table>

1 Press the MENU Key.

2 Press the ▲ or ▼ key to display "Configuration."

3 Press the OK Key.

4 Press the ▲ or ▼ key to display "Triple-Tray Source."

5 Press the OK Key.
The submenu of Triple-Tray Source is displayed.

6 Press the ▲ or ▼ key to select ON or OFF.

7 Press the OK Key.
When the screen in step 4 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.
4.6 Job Separation

The setting of Job separation (set with the printer driver) can be changed while printing of the current job is performed.

**Settings**

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>Job Separation is not performed.</td>
</tr>
<tr>
<td>Between Jobs</td>
<td>Separation paper is inserted between jobs.</td>

<tr>
<td>Every Division</td>
<td>Separation paper is inserted every division.</td>
</tr>
<tr>
<td></td>
<td>When collated printing is directed by the printer driver, separation paper is inserted between sets.</td>
</tr>
<tr>
<td></td>
<td>When non collated printing is directed, separation paper is inserted between pages.</td>
</tr>
</tbody>
</table>

- When inserting separation paper, specify the feed tray separately.
- If "5.3 Separation Paper" is set to "Off," printing stops for a few seconds in place of insertion of separation paper.
- Although Job Separation can also be set on the "Options" tab of the printer driver, you can temporarily stop printing with the PRINT/PAUSE Key and change or reset this function on the printer.
- If an optional HC Finisher is connected, "Punching" and "Add Cover" of the Finisher can also be set with this function.

1. Press the MENU Key.
2. Press the ▲ or ▼ key to display "Configuration."

3. Press the OK Key.
4. Press the ▲ or ▼ key to display "Job Separation."

5. Press the OK Key.
   The submenu of Job Separation is displayed.
6. Press the ▲ or ▼ key to select.
7. Press the OK Key.
   When the screen in step 4 reappears, you can continue setting.
   To exit the setting, press the PRINT/PAUSE key.
4.7 Print Density

You can manually change the print density. The density of overall printing is set. To adjust specific colours or to change the halftone reproduction method, use the "Image processing" tab of the printer driver to adjust or process the image using the application software.

Settings

<table>
<thead>
<tr>
<th>Density-Level 5</th>
<th>Dark</th>
</tr>
</thead>
<tbody>
<tr>
<td>Density-Level 4</td>
<td>Medium dark</td>
</tr>
<tr>
<td>Density-Level 3</td>
<td>Standard</td>
</tr>
<tr>
<td>Density-Level 2</td>
<td>Medium light</td>
</tr>
<tr>
<td>Density-Level 1</td>
<td>Light</td>
</tr>
</tbody>
</table>

Although Print Density can also be set on the "Options" tab of the printer driver, you can temporarily stop printing with the PRINT/PAUSE Key and change or reset this function on the printer.

1 Press the MENU Key.

2 Press the ▲ or ▼ key to display "Configuration."

3 Press the OK Key.

4 Press the ▲ or ▼ key to display "Print Density."

5 Press the OK Key.

The submenu of Print Density is displayed.

6 Press the ▲ or ▼ key to select the desired density.

7 Press the OK Key.

When the screen in step 4 reappears, you can continue setting. To exit the setting, press the PRINT/PAUSE key.
# 4.8 Paper Ejection

Sets the position and adjustment of the Eject Wing and the Auto Stacking Tray.

## Settings

<tr>
<td>Adjusted Position</td>
<td>Since the guides of the Auto Stacking Tray move automatically according to the paper size, the set positions cannot be changed by hand. Use this setting when a little wider (narrower) space is desired depending on the paper. Set the positions in 4.8.3.</td>
</tr>
<tr>
<td>OFF</td>
<td>The Stack Guides are not adjustable. If paper of larger than 320mm × 432 mm (12 5/8&quot; × 17&quot;) is used for printing, set &quot;OFF&quot; and fold the Stack Guide.</td>
</tr>
</tbody>
</table>

| 4.8.3 Stack Guide Adjust | The positions of the Side Guides and End Guide can be specified in 1 mm (0.04") increments when "Adjusted Position" is selected in "4.8.2 Stack Guide." Side Guides: -20 (narrower) mm to +20 (wider) mm (-13/16"(narrower) to +13/16"(wider)) than paper size End Guide: -20 (to left) mm to +20 (to right) mm (-13/16"(to left) to +13/16"(to right)) from paper size |

| 4.8.4 Shifting Guide | When printing is complete, if you press the Stack Guide Open Button, the Stack Guides move outward to allow easy removal of prints. The guides to be moved at this time are specified. For the Stack Guide Open Button, refer to "p.1-4. End Guide: Only the End Guide moves outward. Side Guides: Only the Side Guides move outward. End and Side Guides: Both the End Guide and Side Guides move outward. |

- If "Auto" or "OFF" has been selected in "4.8.2 Stack Guide," when "4.8.3 Stack Guide Adjust" is selected, the setting of "4.8.2 Stack Guide" is changed to "Adjusted Position."
- The setting of "4.8.3 Stack Guide Adjust" is cancelled and changed to "Auto" in the following cases.
  - The power is turned off and then on again.
  - Wake-up from the Sleep mode occurs.
  - Paper of a different size is selected.
  - "Auto" is selected for "4.8.2 Stack Guide."
1 Press the MENU Key.

2 Press the ▲ or ▼ key to display "Configuration."

3 Press the OK Key.

4 Press the ▲ or ▼ key to display "Paper Ejection."

5 Press the OK Key.
   The submenu of "Paper Ejection" is displayed.

---

4.8.1 Eject Wing

1 Ensure that "Eject Wing" is displayed.

2 Press the OK Key.

3 Press the ▲ or ▼ key to select.

4 Press the OK Key.
   When the screen in step 1 reappears, you can continue setting.
   To exit the setting, press the PRINT/PAUSE key.

---

4.8.2 Stack Guide

1 Press the ▲ or ▼ key to display "Stack Guide."

2 Press the OK Key.

3 Press the ▲ or ▼ key to select the method of adjusting the positions.

4 Press the OK Key.
   When the screen in step 1 reappears, you can continue setting.
   If "Adjusted Position" is selected, adjust the amount of movement in 4.8.3.
   To exit the setting, press the PRINT/PAUSE key.
4.8.3 Stack Guide Adjust

1. Press the \( \uparrow \) or \( \downarrow \) key to display "Stack Guide Adjust."

2. Press the OK Key.

3. To adjust the Side Guide positions, press the \( \uparrow \) or \( \downarrow \) key, and to adjust the End Guide position, press the \( \leftarrow \) or \( \rightarrow \) key.

   Only the arrow that corresponds to the pressed key is displayed therefore the relevant value changes.

4. After setting is complete, press the OK Key.

   When the screen in step 1 reappears, you can continue setting.
   To exit the setting, press the PRINT/PAUSE key.

4.8.4 Shifting Guide

1. Press the \( \uparrow \) or \( \downarrow \) key to display "Shifting Guide."

2. Press the OK Key.

3. Press the \( \uparrow \) or \( \downarrow \) key to select.

4. Press the OK Key.

   When the screen in step 1 reappears, you can continue setting.
   To exit the setting, press the PRINT/PAUSE key.
4.9 Temp Data Clear

If a check mark is placed at [Keep the last page of the job in the printer.] in [Controller setting 2] - [Initial setting] of [Administrator] of RISO Console, the last page of previous printing (last sheet in case of duplex printing) is left in the controller as retained data. If retention of data after printing is not desired because of a confidential document, the data can be cleared.

To clear the temporary data when printing stops temporarily, use "Menu 7 Job Clear" to clear the current job and then clear the temporary data.

"Menu 7 Job Clear" → p.2-54

1 Press the MENU Key.

2 Press the ▲ or ▼ key to display "Configuration."

3 Press the OK Key.

4 Press the ▲ or ▼ key to display "Temp Data Clear."

5 Press the OK Key.

6 Check the message. To clear the data, press the OK Key.

Message "Executing ..." is displayed and the data is cleared. If the CANCEL Key is pressed, the screen in step 4 reappears.

7 Press the OK Key.

When the screen in step 4 reappears, you can continue setting.

To exit the setting, press the PRINT / PAUSE Key.
4.10 Image Area (Maximum Print Area)

With this machine, a certain area of space is left along the edges of paper regardless of the original size. Normally, use the setting "Standard." If the image is larger than the printable area, the relevant part of the image is not printed. (Reduction is not performed.)

Settings

<table>
<thead>
<tr>
<th>Standard</th>
<th>Printing can be performed into the area 3mm (1/8&quot;) inside from the sides of paper.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Print Area : 310mm × 454mm (12(\frac{3}{16})&quot; × 17(\frac{7}{8})&quot;&quot;)</td>
</tr>
<tr>

Menu 5  Administration

Sets basic information of the printer such as paper type entry, maintenance, and initial setting. The items set here are effective until the setting is changed regardless of when the power is on or off.

Functions
The functions that can be set are shown below.

- **5.1 Paper Size Entry**  p.2-32
  Five paper sizes such as non-standard sizes can be registered.

- **5.2 Paper Type Entry**  p.2-33
  Five paper types including printer recommended paper, standard paper, and any other types of paper can be registered.

- **5.3 Separation Paper**  p.2-36
  Set the feed tray to be exclusively used for separation paper.

- **5.4 Count Management**  p.2-37
  The number of printed sheets that can be checked.

- **5.5 Head Maintenance**  p.2-40  "Ink Cartridge Replacement"  p.3-16
  Perform maintenance of the ink head in the following cases:
  - Part of print image is blurred.
  - A certain colour is too light.
  - The printer has not been used for a long time.

- **5.6 Configuration Information Print**  p.2-42
  Print the settings in a list.

- **5.7 Network Configuration**  p.2-44
  Set the DHCP, IP address, subnet mask, and default gateway if the printer is used through network.

- **5.8 Initial Setting**  p.2-45
  Set basic conditions such as details of sleep, beep sound, language, and metric/inch switch.

How to Enter the Administration Menu

1. **Press the MENU Key.**

2. **Press the ▲ or ▼ key to display "Administration."**

   ![Menu 5](image)

3. **Press the OK Key.**
   A confirmation screen is displayed.

   ![Confirmation Screen](image)

4. **Check the message and press the OK Key.**
   "5.1 Paper Size Entry" is displayed.
   If the CANCEL key is pressed, the screen in step 2 will reappear.
5.1 Paper Size Entry

Five non-standard paper sizes can be registered.

When using non-standard size paper, be sure to register the size in advance.

Registered values are displayed in Paper Size of "4.1.1 Standard Feed Tray," "4.2.1 Feed Tray 1," and "4.3.1 Feed Tray 2."

If the paper sizes have been registered, the registered values will be displayed.

_range of paper size that can be set_

<table>
<thead>
<tr>
<th></th>
<th>Width (Vertical)</th>
<th>Length (Horizontal)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printer</td>
<td>90 - 340mm</td>
<td>148 - 550mm</td>
</tr>
<tr>
<td></td>
<td>(3(\frac{3}{16})&quot; - 13(\frac{3}{8})&quot;&quot;)</td>
<td>(5(\frac{13}{16})&quot; - 21(\frac{3}{8})&quot;&quot;)</td>
</tr>
<tr>
<td>Printer (with finisher installed)</td>

<td>(5(\frac{13}{16})&quot; - 19(\frac{3}{8})&quot;&quot;)</td>
</tr>
</tbody>
</table>

- Be sure to set this item before proceeding to "4.1.1 Standard Feed Tray," "4.2.1 Feed Tray 1," and "4.3.1 Feed Tray 2."
- The registered sizes can also be changed.
- To clear a registered paper size, set the paper size to "000 mm x 000 mm."
  If a paper size is registered for the Standard Feed Tray or another feed tray and paper of the registered size is actually set, the size cannot be deleted from the choices of "Paper Size."
- If an optional HC Finisher is connected, the paper sizes that can be used depend on the Finisher functions to be used. For details, see "HC5500 User's Manual for Printer Driver."

1. Use steps 1 to 4 (p.2-31) to display "Administration."

2. Press the ▲ or ▼ key to display "Paper Size Entry".

3. Press the OK Key.

4. Press the ▲ or ▼ key to display the desired number to be registered.

5. Press the OK Key.

  The submenu of "Paper Size Entry" is displayed.

6. Press the ▲ keys to move the cursor, and press the ▼ keys to enter the paper size.

7. Press the OK Key.

  To exit the setting, press the PRINT/PAUSE key.
## 5.2 Paper Type Entry

If any paper other than printer recommended paper is used or paper is not fed properly, it could result in poor print quality. You should register the paper type and feeding according to the paper type specifications. The registered setting is displayed in Paper Type of "4.1.2 Standard Feed Tray," "4.2.2 Feed Tray 1," and "4.3.2 Feed Tray 2."

Also if printer recommended paper is used and paper is not fed properly because of operating environment or the like, the setting can be changed.

When changing the setting or registering paper other than printer recommended paper, contact your local dealer (or service representative) for consultation. Advice on proper setting will be given.

### Settings

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

If the following settings are made concerning the paper, the paper type is not displayed at "4.2.2 Feed Tray 1" and "4.3.2 Feed Tray 2." (These types of paper cannot be used in these trays.)

- Paper Type: Envelope, Card, Card-IJ
- Paper Feed Control: Envelope, Postcard
5.2.1 Registering a New Paper Type

1 Use steps 1 to 4 (p.2-31) to display "Administration."

2 Press the or key to display "Paper Type Entry."

3 Press the OK Key.

4 Press the or key to display the desired number to be registered.

5 Press the OK Key.

6 Press the OK Key when "Registration" is displayed.

7 Press the or key to select ON or OFF.

8 Press the OK Key.

   The screen in step 6 appears again.

   Set the Paper Type.

9 Press the or key to display "Paper Type."

10 Press the OK Key.

   The submenu of paper type appears.

11 Press the or key to select the desired paper type.

12 Press the OK Key.

   The screen in step 9 appears again.

   Perform Paper Feed Control.

13 Press the or key to display "Paper Feed Control."

14 Press the OK Key.

   The submenu of paper feed control appears.
15 Press the ▲ or ▼ key to select the desired paper type.

<table>
<thead>
<tr>
<th>Paper Feed Control</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard</td>
</tr>
</tbody>
</table>

16 Press the OK Key.
The screen in step 13 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.

Standard Paper 1/ High-Quality 1/ High-Quality 2

1 Use steps 1 to 4 (p.2-31) to display "Administration."

2 Press the ▲ or ▼ key to display "Paper Type Entry."

<table>
<thead>
<tr>
<th>Administration</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.2</td>
</tr>
<tr>
<td>Paper Type Entry</td>
</tr>
</tbody>
</table>

3 Press the OK Key.

4 Press the ▲ or ▼ key to display the desired paper to change the settings.

<table>
<thead>
<tr>
<th>Paper Type Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.2.7</td>
</tr>
<tr>
<td>High-Quality 1</td>
</tr>
</tbody>
</table>

5 Press the OK Key.
The submenu of standard feed tray appears.
Perform paper feed control.

6 Press the OK Key.

<table>
<thead>
<tr>
<th>Paper Feed Control</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard</td>
</tr>
</tbody>
</table>
5.3 Separation Paper

If you use "4.6 Job Separation", specify the feed tray in which the separation paper is loaded.

 ':: Settings

The separation paper can be used even if the size and the orientation are different from those of the printer paper.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>The separation paper tray is not specified. Printing stops for a few seconds in place of insertion of separation paper.</td>
</tr>
<tr>
<td>Standard Feed Tray</td>
<td>The Standard Feed Tray is used for separation paper.</td>
</tr>
<tr>
<td>Feed Tray 1</td>
<td>Feed Tray 1 is used for separation paper.</td>
</tr>
<tr>
<td>Feed Tray 2</td>
<td>Feed Tray 2 is used for separation paper.</td>
</tr>
</tbody>
</table>

- The separation paper tray is used exclusively for Job Separation. If "Menu 6 Feed Tray Selection" is set to "Auto" and "Menu 4.4 Feed Tray Relay" is set, this feed tray is not used for printing.
- If the separation paper tray runs out of paper during printing, no-paper error will be displayed and printing stops temporarily.
- If a finisher is connected, paper in the separation paper tray can be added as a front cover or a back cover by using the "Add cover" function of the finisher. In this case, specify the tray in which cover sheets are loaded. If "OFF" is set, an error will be displayed when printing is performed.

Caution in the following case

If paper larger than the paper for printing or paper of a different orientation is specified as separation paper, the stack guides are spread according to the larger paper size. Printed paper, therefore, may not be arranged properly.

1 Use steps 1 to 4 (p.2-31) to display "Administration."

2 Press the ⬆️ or ⬇️ key to display "Separation Paper."

3 Press the OK Key.

The submenu of separation paper appears.

4 Press the ⬆️ or ⬇️ key to set.

   Separation Paper
   OFF

5 Press the OK Key.

When the screen in step 1 reappears, you can continue setting. To exit the setting, press the PRINT/PAUSE key.
5.4 Count Management

The number of printed sheets can be checked.

- The number of sheets that have been ejected in the Paper Receiving Tray is displayed.
- For copy count, in duplex printing, each side is counted, and therefore one sheet of both sides is counted by two. Since the paper transfer path varies depending on the functions that you use, one sheet in simplex printing may be counted as two.
- For Count Pattern, one sheet is counted as one regardless of simplex or duplex printing.

**Settings**

<table>
<thead>
<tr>
<th>Count Management</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>5.4.1 Copy Count</strong></td>
<td>The total number of sheets that have been printed until now is displayed. Paper on which printing is not performed such as separation paper is also counted.</td>

5.4.1 Copy Count

1. Use steps 1 to 4 (p.2-31) to display "Administration."

2. Press the ▲ or ▼ key to display "Count Management."

3. Press the OK Key.

4. Press the ▲ or ▼ key to display "Copy Count."

5. Press the OK Key.
   The total number of sheets is displayed.

6. After checking is complete, press the OK Key.
   When the screen in step 4 reappears, you can continue setting.
   To exit the setting, press the PRINT/PAUSE key.
5.4.3 Count Pattern

1. Use steps 1 to 4 (p.2-31) to display "Administration."

2. Press the ▲ or ▼ key to display "Count Management."

3. Press the OK Key.

4. Press the ▲ or ▼ key to display "Count Pattern."

5. Press the OK Key.

6. Press the ◀ or ◁ keys to move the cursor, and press the ▲ ▼ keys to input the count No. of Count Pattern.

7. After input is complete, press the OK Key.
   The number of sheets of the specified count pattern is displayed.

8. After checking is complete, press the OK Key.
   When the screen in step 4 reappears, you can continue setting.
   To exit the setting, press the PRINT/PAUSE key.
5.5 Head Maintenance

Perform maintenance of the print head section. You can also set the cycle of automatic cleaning. Use this function when there is a problem of image quality. For example, if parts of print images are blurred, white lines appear, a specific colour is light and when the printer will not be used or has not been used for a long time.

In the factory default setting, the cleaning cycle is set to 500 sheets.

Settings

<table>

| OFF: Beep sound is disabled. |
| 5.8.4 Beep Sound - Status | Set whether or not to sound the beeper when, for example, printing is completed.
| ON: Beep sound is enabled.
| OFF: Beep sound is disabled. |
| 5.8.5 Beep Sound - Error | Set whether or not to sound the beeper when an error such as paper jam occurs.
| ON: Beep sound is enabled.
| OFF: Beep sound is disabled. |
| 5.8.7 Displayed Language | Set the language displayed on the Operation Panel.
| Japanese/UK English/US English/French/German/Italian/Spanish/Portuguese |
| 5.8.8 Metric/Inch Switch | Select the Metric or Inch unit for display on the Operation Panel.
| mm: Displayed in mm.
| inch: Displayed in inch. |
| 5.8.17 Tray Selection Rule | Sets the condition for selecting a tray using the auto tray selection function.
| Size: A tray in which paper of the size specified by the controller is set will be selected with auto tray selection.
| Size & Tray: A tray in which paper of the size and type specified by the controller is set will be selected with auto tray selection. |
| 5.8.18  | Print Mode Auto-ON | Sets whether or not the print mode is automatically turned on when the printer is not used for a certain time with the print mode OFF.  
**ON**: The print mode will be automatically turned off.  
**OFF**: The print mode will not be turned off. |
| 5.8.19  | Print Auto-ON Time | Sets the time that elapses until the print mode is turned on when "Print Mode Auto-ON" is set to "ON."  
The time can be set to 1 to 60 minutes. |
| 5.8.20  | Menu Auto-Shut OFF | Sets whether or not the print mode is automatically turned off when no operation is made for a certain time on the menu setting screen.  
**ON**: The print mode will be automatically turned off.  
**OFF**: The print mode will not be turned off. |
| 5.8.21  | Menu Shut OFF Time | Sets the time that elapses until the print mode is turned off when "Menu Auto-Shut OFF" is set to "ON."  
At this time, the current menu settings will not be retained.  
The time can be set to 1 to 60 minutes. |
| 5.8.22  | Stand-by | Sets whether or not the printer enters the stand-by mode to reduce power consumption when the printer is not used for a certain time.  
In the stand-by mode, when the printer receives data from a computer, the printer is automatically started and starts printing.  
**ON**: The stand-by mode is enabled.  
**OFF**: The stand-by mode is not used. |
| 5.8.23  | Stand-by Period | Sets the time that elapses until the printer enters the stand-by mode when "Stand-by" is set to "ON."  
The time can be set to 1 to 99 minutes. |
| 5.8.50  | Head Recovery | Performs powerful cleaning of the print head nozzles to restore them to the initial state after the printer is not used for a long time. |

5.8.6, 5.8.9 - 5.8.16, 5.8.24 - 5.8.49 are not displayed.
5.8.1 Sleep

1. Use steps 1 to 4 (p.2-47) to display "Administration."

2. Press the ▲ or ▼ key to display "Initial Setting."

3. Press the OK Key.

4. Press the ▲ or ▼ key to display "Sleep."

5. Press the OK Key.

6. Press the ▲ or ▼ key to select ON or OFF.

7. Press the OK Key.

When the screen in step 4 reappears, you can continue setting. To exit the setting, press the PRINT/PAUSE key.

5.8.2 Waiting Time

1. Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2. Press the ▲ or ▼ key to display "Waiting Time."

3. Press the OK Key.

4. Press the ▶ keys to move the cursor, and press the ▲ ▼ keys to input the Waiting Time.

5. Press the OK Key.

When the screen in step 2 reappears, you can continue setting. To exit the setting, press the PRINT/PAUSE key.
5.8.3 Beep Sound -Key

1 Use steps 1 to 3 of "5.8.1 Sleep" (☞ p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Beep Sound -Key."

3 Press the OK Key.

4 Press the ▲ or ▼ key to select ON or OFF.

5 Press the OK Key.

When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.

5.8.4 Beep Sound -Status

1 Use steps 1 to 3 of "5.8.1 Sleep" (☞ p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Beep Sound -Status."

3 Press the OK Key.

4 Press the ▲ or ▼ key to select ON or OFF.

5 Press the OK Key.

When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.
5.8.5 Beep Sound -Error

1 Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Beep Sound -Error."

3 Press the OK Key.

4 Press the ▲ or ▼ key to select ON or OFF.

5 Press the OK Key.
When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.

5.8.7 Displayed Language

1 Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Displayed Language."

3 Press the OK Key.

4 Press the ▲ or ▼ key to select.

5 Press the OK Key.
When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.

5.8.8 Metric/Inch Switch

1 Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Metric/Inch Switch."

3 Press the OK Key.

4 Press the ▲ or ▼ key to select the unit.

5 Press the OK Key.
When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.
5.8.17 Tray Selection Rule

1 Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Tray Selection Rule."

3 Press the OK Key.

5.8.18 Print Mode Auto-ON

1 Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Print Mode Auto-ON."

3 Press the OK Key.

5.8.19 Print Auto-ON Time

1 Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Print Auto-ON Time."

3 Press the OK Key.
5.8.20 Menu Auto-Shut OFF

1 Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Menu Auto-Shut OFF."

3 Press the OK Key.

4 Press the ▲ or ▼ key to select ON or OFF.

5 Press the OK Key.

When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.

---

5.8.21 Menu Shut OFF Time

1 Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Menu shut OFF Time."

3 Press the OK Key.

4 Press the ▲ ▼ keys to move the cursor, and press the ▲ ▼ keys to input the desired time.

5 Press the OK Key.

When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.

---

5.8.22 Stand-by

1 Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2 Press the ▲ or ▼ key to display "Stand-by."

3 Press the OK Key.

4 Press the ▲ or ▼ key to select ON or OFF.

5 Press the OK Key.

When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.
5.8.23 Stand-by Period

1. Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2. Press the ▲ or ▼ key to display "Stand-by Perid."

3. Press the OK Key.

4. Press the ▲ ▼ keys to move the cursor, and press the ▲ ▼ keys to input the desired time.

5. Press the OK Key.

When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.

5.8.50 Head Recovery

1. Use steps 1 to 3 of "5.8.1 Sleep" (p.2-47) to display "Initial Setting."

2. Press the ▲ or ▼ key to display "Head Recovery."

3. Press the OK Key.

4. After checking the message, press the OK Key.

5. Press the OK Key.

When the message "Cleaning Print Head ?" blinks, cleaning is performed. After cleaning is completed, the screen in step 2 reappears.
To exit the setting, press the PRINT/PAUSE key.
Menu 6  Feed Tray Selection

If the paper conditions of data received from a computer and the setting of "5.8.17 Tray Selection Rule" do not match the conditions of any of the Standard Feed Tray and other feed trays, printing will not start. In this case, you can specify the Standard Feed Tray or another feed tray where the printer paper is set and start printing with no trouble.

Selectable Feed Trays

<table>
<thead>
<tr>
<th>Selectable Feed Trays</th>
<th>Selectable feed trays are shown below.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Normally, set &quot;Auto.&quot; A feed tray proper for data from the computer and the setting of &quot;5.8.17 Tray Selection Rule&quot; is automatically selected.</td>

</tr>
</tbody>
</table>

1. Press the MENU Key.

2. Press the ↑ or ↓ key to display "Feed Tray Selection."

3. Press the OK Key.

4. Press the ↑ or ↓ key to select the desired feed tray.

5. Press OK Key.

When the screen in step 2 reappears, you can continue setting.
To exit the setting, press the PRINT/PAUSE key.
Menu 7  Job Clear

Cancels the currently printed job and clears the data.

What is Job?
When data is transmitted from a computer to the printer, the controller processes the data and sends the print data to the FORCEJET™ ENGINE. The processed data is called "Job." "Job" means the data shown below.

- Data suspended temporarily
- Data for which additional printing is set with the Temporary Data Retrieve function.

1 Press the MENU Key.

2 Press the ▲ or ▼ key to display "Job Clear."

   Menu 7
   Job Clear

3 Press the OK Key.

4 Check the message. To clear, press the OK Key.
   Message "Executing" is displayed and the data is cleared. If the CANCEL key is pressed, the screen in step 2 appears again. When the screen in step 2 reappears, you can continue setting. To exit the setting, press the PRINT/PAUSE Key.
Chapter 3 Troubleshooting

This chapter describes the causes of and measures against trouble indicated with an error message displayed on the Operation Panel or lighting symbol. This chapter also describes how to remove jammed paper and replacing an ink cartridge.
Explanation of Set Error Display

If trouble occurs during printing, printing stops and a symbol lights up on the Operation Panel or an error message appears in the display. You can check the location based on the symbol or number and see the information from the message in the display.

**Symbol Display on Operation Panel**
A symbol indicating the relevant portion or type lights up. It may indicate a paper jam or ink cartridge replacement.

**Error Message**
A message indicating the detail of the error and the solution appears in the display.

**Remaining Volume Notice Indicators**
If remaining volume of paper in the Feed Trays (Standard Feed Tray) or when ink is low (approximately 30%), the relevant Remaining Volume Notice Indicator will light up. After the indicator lights up, printing can be continued. When the ink runs out, the INK CARTRIDGE Indicator and the cartridge number in which the ink runs out will light up which will cause printing to halt. When paper runs out, a message indicating to add paper will appear in the display and will be stopped. If the indicator lights up, prepare ink cartridges or paper for replacement.

"Ink Cartridge Replacement" p.3-16  "Loading Paper" p.1-10
FORCEJET™ Link Symbol

HC5500 Series realizes high speed printing by performing the optimum data processing and colour management with the printer controller and adjusting print speed, paper size, paper quality, and ink quantity totally with the FORCEJET™ ENGINE. The FORCEJET™ Link Symbol indicates whether each printing related section functions properly.

If colour management cannot be performed properly because, for example, an ink cartridge is not set, the FORCEJET™ Link Symbol goes out. At this time, check the status of consumables and settings.

Error Message and Error Number

Error Number

Under a message in the display, an error number that consists of alphanumeric characters is displayed. The first letter of the error number indicates the error type.

The number of digits in relation to error number depends on the error location.

Paper jam occurs

If a paper jam occurs in the printer or paper is not fed, printing stops, the JAM indicator, and the number indicating the jam location will light up. In this case, remove the jammed paper and press the PRINT/PAUSE Key, printing will resume.

Since this unit performs high speed printing, paper jams may occur at multiple locations. In this case, remove all the jammed paper.

If an optional HC Finisher is connected and a paper jam occurs in the Finisher (21 on the Operation Panel is lit), refer to “HC Finisher Maintenance Guide.”

When removing jammed paper, take care not to leave pieces of paper inside the printer.

Paper Jam Location

Details of the indicated locations are shown below. For detailed procedure, refer to the respective indicated page.

<table>
<thead>
<tr>

</tbody>
</table>

(1) Paper Jam in the Standard Paper Feed Tray

1. While pressing the Paper Release Lever on the paper feed side to the left, remove the paper.

2. Press the CANCEL/BACK Key.
   The paper jam error is cleared.
(2) Paper Jam on the Transfer Roller

1 Open the Front Cover.

2 Turn Dial A and remove the paper from the Transfer Roller side.

3 Close the Front Cover.

(3) Paper Jam in the Paper Receiving Section

1 Pull out the jammed paper and remove it.

Pull out the jammed paper from the side of the Paper Receiving Tray.

If it is not easy to pull out, do not pull it forcibly because the paper might be torn.
Open the Front Cover and remove the paper from the side of the Transfer Roller.
(4) Paper Jam at the Right of the Transfer Unit

1. Open the Right Transfer Path Cover.

2. Remove the paper.

3. Close the Right Transfer Path Cover.

(5) Paper Jam in the Duplex Transfer Unit

1. Open the Front Cover.

2. Lift the tab at the left side of the Reversing Path Cover and lock it.

3. Turn Dial B.
   If the paper is removed, proceed to step 7.
   - Turn Dial B several times to check to see if any paper remains. Multiple sheets of paper may have jammed. Turn the dial repeatedly until no paper can be removed.
4 Pull out the Duplex Transfer Unit.

5 Open the unit and check inside.
   If paper remains, remove it.

6 Return the Duplex Transfer Unit to its original position.

7 Return the tab at the left of the Reversing Path Cover to its original position.

8 Close the Front Cover.
1. Open the Front Cover.

2. Lift the tab at the left side of the Reversing Path Cover and lock it.

3. While turning Dial B in the direction indicated by the arrow, remove the paper.

4. If the paper cannot be removed, open the Left Transfer Path Cover and remove the paper.

5. If the paper cannot be removed, while turning Dial C in the direction indicated by the arrow, remove the paper.

6. Return the tab at the left of the Reversing Path Cover to its original position.

7. Close the Front Cover.
1 Pull out the Feed Tray.

2 Remove the jammed paper.

3 If the paper cannot be removed, open the Transfer section door at the left side of the Feed Tray and remove the paper.

4 Close the door and return the Feed Tray.
(20) Paper Jam in the Transfer Unit

1. Open the Front Cover.

2. Turn the Transfer Lock Lever to the left and turn down the tab to the right.

3. Remove the jammed paper.

4. Return the tab to its original position and turn the Transfer Lock Lever to the right.

5. Close the Front Cover.
Ink Cartridge Replacement

If ink runs out, the INK CARTRIDGE indicator and the indicator that shows the location of the empty cartridge will light up, printing will be halted. Be sure to check the colour of the Ink Cartridge and replace it.

This section describes the notes in handling an Ink Cartridge. Handling of Ink Cartridge is also described in "Safety Precautions" (p.v) and "Before Starting to Use" (p.vii, p.viii). Read also the description on these pages.

⚠️ CAUTION

Ink may be stuck to the ink feed opening. Be careful not to touch it with your hands or clothes. If your hands are stained with the ink, wash it off immediately with a detergent. If ink gets into your eyes, flush it out immediately with plenty of water.

- Be sure to use dedicated ink specified by our company. Otherwise, a failure or trouble might occur.
- Do not remove the Ink Cartridge until the INK CARTRIDGE indicator lights up.
- Do not shake or drop the Ink Cartridge.
- Do not keep the Ink Cartridge with its nozzle downward.
- When replacing an ink cartridge, do not leave the printer with an ink cartridge removed. A failure might occur.
- Do not shake the Ink Cartridge. If the cartridge is shaken, air bubbles are generated and ink may not be discharged properly, resulting in blurred printing.
- Do not remove the caps(white) from the ink feed opening and the air intake.

- Do not add ink into the Ink Cartridge.
- Use as soon as possible after purchase to maintain optimum print quality.
<Used Ink Cartridge>

- Do not release the ink left in the cartridge into a sewer or personal disposal unit.
- Used Ink Cartridges are collected by a service representative. After use is complete, attach the cap and put the cartridge into the inner bag and packing material. When attaching the cap or packing, be sure to hold the Ink Cartridge with the cap up. Caution: Do not turn the Ink Cartridge upside down.

As an example, procedure for replacing the Yellow (Y) Ink Cartridge ((14) is light) is described.

1. Open the Ink Cover.
2. While lifting the Ink Cartridge to be replaced, pull it toward the front side and remove it.
3. Remove the cap from the new Ink Cartridge.
4. Remove the two caps from the ink feed opening and the air intake.
5. Hold the surface of the Ink Cartridge with the ▲ mark up and insert the cartridge until it stops.
6. Close the Ink Cover.
The printer does not operate.

Print density setting is light.  
In the printer driver screen or the printer menu setting, set darker print density.  
"Print density” of "HC5500 User’s Manual for Printer Driver" p.2-24  
When setting in the printer menu setting: 
The print head is clogged.  
Perform "Normal Cleaning" from the menu setting.  
If the problem cannot be solved with the method above, specify particularly the head of a lighter colour and perform "Hyper-Cleaning."  
"5.5 Head Maintenance" p.2-40 |
| Printed image is too dark.   | Type of paper loaded for a Feed Tray (or Standard Feed Tray) is not correct.  
Load the correct paper type at [Paper Type] of the menu setting.  
White stripes appear on images. | The print head is clogged.  
First, perform "Normal Cleaning" from the menu setting.  
If the problem cannot be solved even if normal cleaning is performed several times, perform "Head Recovery."  
"5.5 Head Maintenance" p.2-40  
"5.8.50 Head Recovery" p.2-52 |
| Paper is stained.            | Paper that cannot be used is loaded.  
Check the paper types that can be loaded in the Standard Feed Tray and the other Feed Trays.  
"Usable Paper" p.1-6 |
| Edge of paper is stained. | Curled paper is used.  
The curled portion hits the print head and is stained. Since the print head may be damaged, do not use curled paper.  
Performing duplex printing  
Note that the edges of paper may be stained depending on the original. |

<th>Cause and Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Print speed is too low.</td>
<td>The guides in the Standard Feed Tray (Feed Tray) do not fit the paper width. The paper size is judged based upon the guide positions, and print speed depends on specifications of paper size. Adjust the stack guides securely to the width of the paper.</td>
</tr>
<tr>
<td>A paper jam occurs each time printing is performed.</td>
<td>Too much paper is loaded in the Standard Feed Tray or other Feed Trays. When the maximum number of sheets of paper that can be loaded in the Standard Feed Tray or other Feed Trays is exceeded for the number of paper that can be loaded. Please refer to &quot;Loading Paper&quot; p.1-10.</td>
</tr>
<tr>
<td>Paper that cannot be used is loaded.</td>
<td>Check the paper types that can be loaded in the Standard Feed Tray and the other Feed Trays. Do not use particularly wrinkled or curled paper because it may cause a paper jam. &quot;Usable Paper&quot; p.1-6</td>
</tr>
<tr>
<td>Non-standard size paper is used.</td>
<td>When loading non-standard size paper, you must register the size at &quot;5.1 Paper Size Entry&quot; and &quot;5.2 Paper Type Entry&quot; of the menu setting in advance. &quot;5.1 Paper Size Entry&quot; p.2-32 &quot;5.2 Paper Type Entry&quot; p.2-33</td>
</tr>
<tr>
<td>• There’s too much paper powder.</td>
<td>The paper stripper pressure is not properly adjusted. Use a coin to turn the Paper Stripper Dial located in the paper feed side to adjust the pressure.</td>
</tr>
<tr>
<td>• Double feed occurs.</td>
<td></td>
</tr>
<tr>
<td>• Thick paper such as postcard is mis-fed.</td>
<td></td>
</tr>
<tr>
<td>• The back surface of thick paper such as postcard is peeled off.</td>
<td></td>
</tr>
<tr>
<td>Paper is not fed at all.</td>
<td>The Paper Feed Pressure Adjustment Lever does not fit the paper thickness. When using thick paper, set the Paper Feed Pressure Adjustment Lever to the &quot; CARD&quot; position. When printing onto paper other than thick paper, set the lever to the &quot; NOR-MAL&quot; position. If paper mis-feed occurs frequently, however, set the lever to the &quot; CARD&quot; position. &quot;Paper Feed Pressure in Standard Paper Feed Tray&quot; p.1-13</td>
</tr>
<tr>
<td>Paper feed control is not proper.</td>
<td>Change the paper feed control set in the Standard Feed Tray or other Feed Trays at &quot;5.2 Paper Type Entry&quot; of the menu setting. &quot;5.2 Paper Type Entry&quot; p.2-33</td>
</tr>
<tr>
<td>Problem</td>
<td>Cause and Solution</td>
</tr>
<tr>
<td>---------</td>
<td>-------------------</td>
</tr>
<tr>
<td>Although paper is set, &quot;No Paper&quot; error can occur.</td>
<td>[Paper size] and [Paper type] set in the printer driver screen do not match those in the menu setting on the printer. Even if proper paper is loaded in the feed tray, if the settings of &quot;Paper Size&quot; and &quot;Paper Type&quot; of the menu setting on the printer are not correct, &quot;No Paper&quot; error occurs. Set the conditions of the feed tray according to the paper in the feed tray. Alternatively, a condition is set at &quot;Tray selection Rule.&quot; Ensure that the paper placed in the tray matches the condition of the tray setting. &quot;Configuration 4.1/4.2/4.3&quot; p.2-19 &quot;5.8.17 Tray Selection Rule&quot; p.2-50 Press the Cancel/Back key to display the output paper size at the lower left of the operation panel. Check the size and set paper of the correct size or specify the proper tray from the operation panel of the printer to perform printing. If you specify the Feed Tray on the Operation Panel of the printer, printing can be performed. &quot;Menu 6 Feed Tray Selection&quot; p.2-53</td>
</tr>
<tr>
<td></td>
<td>The selected tray is set for &quot;Separation Paper.&quot; Set &quot;5.3 Separation Paper&quot; of the menu setting to &quot;OFF.&quot; &quot;5.3 Separation Paper&quot; p.2-36</td>
</tr>
<tr>
<td></td>
<td>The Standard Feed Tray is not a feed tray for auto feed tray selection. If &quot;4.5 Triple-Tray Source&quot; is set to &quot;ON&quot;, the Standard Feed Tray is included into feed trays for selection when &quot;Auto feed tray selection&quot; is selected in &quot;Paper feed tray&quot; of the printer driver. &quot;4.5 Triple-Tray Source&quot; p.2-22</td>
</tr>

</table>
Chapter 4 Appendix
A variety of options are available for convenient use of this unit. For purchase, contact your dealer (or service representative) for inquiry.

**RISO Scanner HS2000**

By connecting a scanner and a display monitor (products specified by our company), you can perform high-speed full-colour printer copies.

**Finisher Functions**

By connecting an HC Finisher to this machine, you can perform automatically postprocessing of printing such as stapling, punching, booklet creation at a high speed.

(As of January 2006)
Consumables

• Note that specifications and types of consumables are subject to change without prior notice.
• For the price, contact your local dealer (or service representative) for inquiry.

Ink Cartridge

Use ink cartridges specifications as directed by our company. Do not use other products because use of improper consumables may cause a failure or trouble.

### Principal Functions

- **Colour Management**: "ComColor™ Standard" colour management is provided. *Auto colour matching function based on output setting and paper setting
- **Pagination**: Multi-up (single page) / Multi-up (multi-page) / Booklet / Fold
- **Image Processing**: Gamma control: Contrast / Density Line Smoothing Screening: Error diffusion / Dot screen
- **Image Position Adjustment**: Image position can be adjusted in the vertical and horizontal directions from -20mm to 20mm (-13/16" to 13/16") on both the front and back sides.
- **Form Function**: Registration of form, Overlay Function
- **Paper Feed/Ejection Processing**: Auto tray selection, Duplex printing, Job separation, Printer collate, Support of HC Finisher (optional), Output face setting
- **Clustering**: Job delegation (up to 4 units of controllers can be registered) Job split (Job split limit: Number of pages / Output volume)
- **Sample page print**: Configuration, Sample image, PS font list
- **Security print**: Security code setting, Job name display setting

### Web Console Function

- **Monitoring Function**: Engine status display, Remaining volume display, Paper information display
- **Job Manager Function**: Job status display Job storage management Archive management Form management Scan and Storage management
- **User Function**: Account record display, Storage of history (monthly/daily)
- **Administrator Function**: Network setting, Security setting, Font download, Direct output setting, Storage folder setting, Paper size entry, Initial Setting
- **Applicable Browser**: Windows: Internet Explorer Ver. 6.0 SP1 or later / J2SE1.4.2 or later MacOS9: Internet Explorer Ver. 5.1.6 for Mac or later / MRJ2.2.6 or later MacOSX: Internet Explorer Ver. 5.2.3 for Mac or later / J2SE1.4.1 or later
**Controller Section (If the RISO Controller HC3R-5000 is installed)**
